WHAT WE DO

Protecting What Matters

Ulti Group is NZ's leading and most trusted provider of specialist doors and dock loading systems. We partner with you to optimise temperature control, save energy, improve efficiency and protect what matters most to you, your people, products and profits.

We offer customised door solutions to meet your facilities specific requirements and our dock loading systems enhance efficiency, safety, and product flow while reducing the risk of damage and accidents.

Protect Your People

'Safety first' is second nature to us. With our expert advice and support we help ensure the safety of movement within your facility.

Protect Your Product

World-leading industrial doors and dock loading systems designed for the specific needs your industry.

Protect Your Profit

We'll help you conserve energy, improve efficiency, minimize pests and increase productivity. Reducing cost and risk at your facility.

Problems We Solve

Hygiene/Environment Control

Reduce risk by installing robust hygiene control systems that protect against air-borne contaminants.

Warehouse Protection

Prevent losses by installing reliable barriers, bollards and building protection systems that keep your people, facility and products safe.

Pest Prevention

Keep birds, insects and vermin out by using specialist screens, protective curtains and high-speed doors.

Warehouse Efficiency

Increase productivity and efficiency by reducing the time it takes for people and products to move through your facility.

Temperature Control

Lower operating costs by preventing ice build-up and temperature loss that leads to expensive energy bills and safety issues.

Site Safety

Improve safety measures with walkway barriers, visual and audio warning systems to provide more protection for your people.

Industries We Serve

Dairy & Food Processing

Cold Storage

Pharmaceutical

Manufacturing

Logistics & Warehousing

Retail & Supermarket

Automotive

Agriculture and Horticulture

Education

Healthcare

Hospitality

Government

Aviation

Marine & Ports

Mining

Our Services

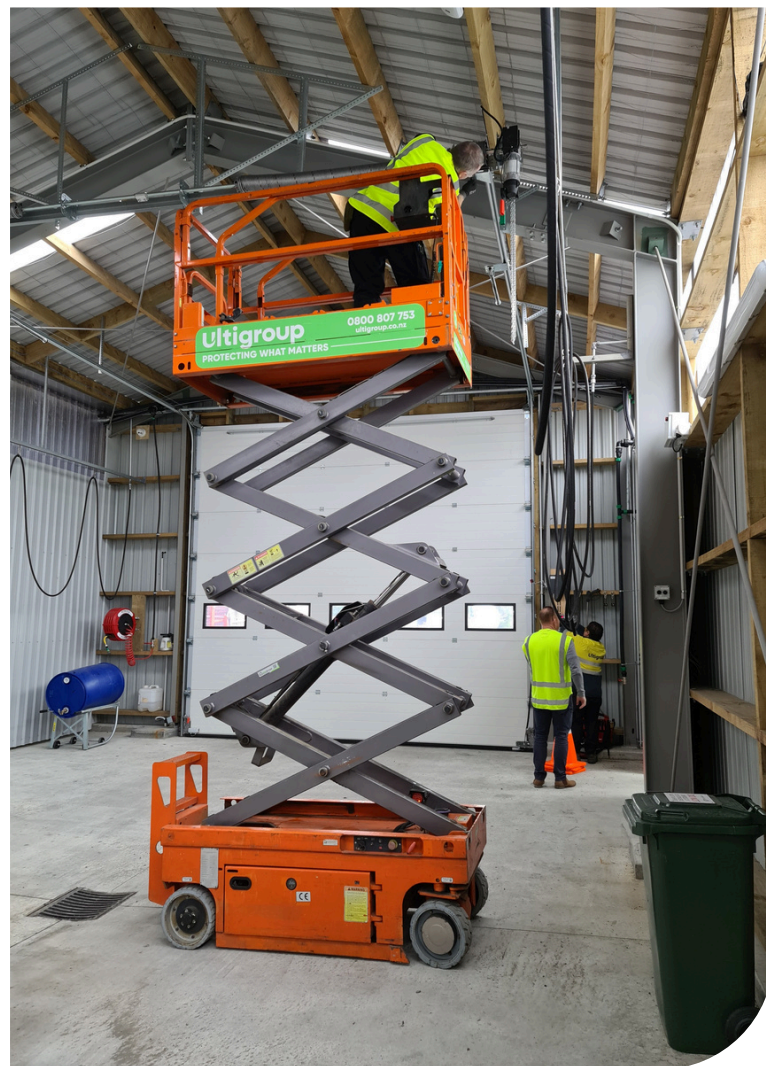

WE ARE YOUR PARTNER, WE'VE GOT YOUR BACK.

At Ulti Group, we understand that downtime in your operations can be costly. That's why we offer both responsive callout and preventative maintenance services for our products. You can have peace of mind knowing that you're in safe hands.

Responsive Callouts

Highly skilled technicians available NZ-wide, responding to your call quickly with well-equipped vehicles and access equipment – Our 0800 number is available 24 hours a day, 7 days a week.

Wherever you are located our trained technicians and our network of dedicated contractors are nearby, be it Invercargill, Kaikoura, Matamata or Kaitaia. Wherever you are, wherever it's broken – we'll be there!

Training and Safety

All technicians are well-trained in Ulti Group's products as well as in site safety. Courses and certificates held by our team include working at heights, site safe, permit receivers, first aid, fire training to name a few. You can trust on our team to be well trained and work safely.

Fully Equipped

With modern vehicles and our own access equipment we arrive at our site with all necessary tools required to complete the job.

Any Brand, Anywhere, Anytime

Our widely skilled team will gladly service any brand of door or dock equipment, meaning less work for you, not having to find different companies to service different brand products.

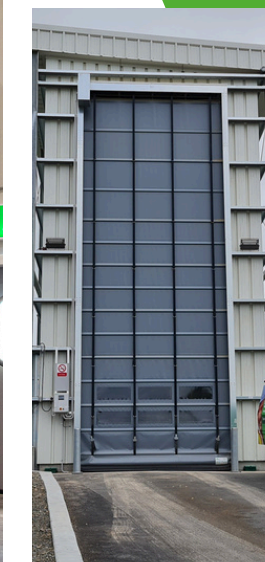

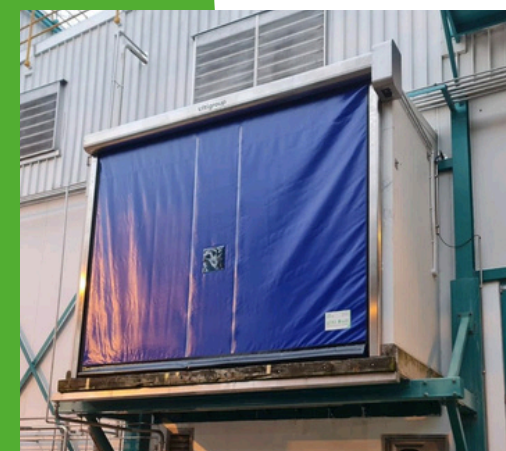

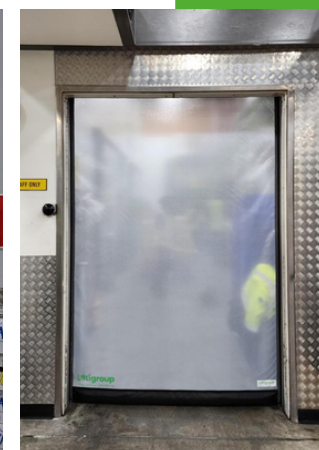

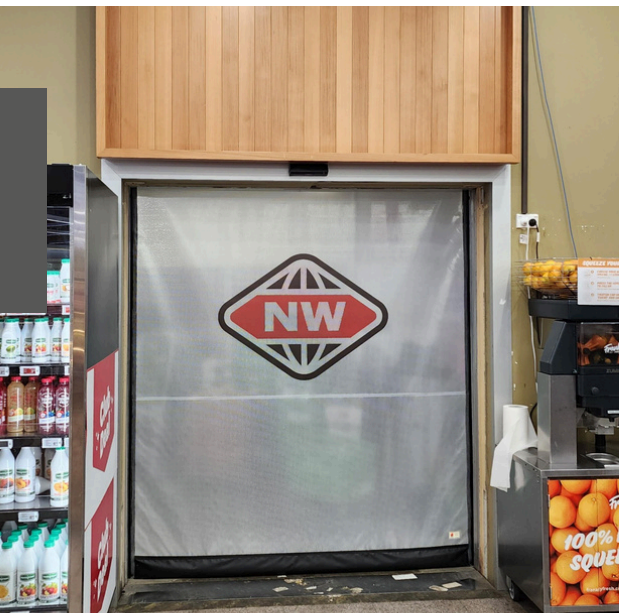

Preventative Maintenance Service

Ulti Group offers a simple and effective way to minimize costs while maximizing the lifetime of your door, dock, or other equipment. We provide regular maintenance, detect operational faults before they become costly repairs, and offer periodic inspections of your doors.

Here's some things you could expect when investing in a preventative maintenance offering from Ulti Group:

- Regular maintenance to keep their doors and equipment operating at optimum performance levels.
- Detection of operational faults before they become costly repairs.
- Periodic inspections, customised based on the type, age, and usage of the products involved.
- After-service reports containing detailed information on the condition of their doors, upcoming repair alerts, and recommended upgrades for consideration and approval.
- Expert support for a wide range of specialist door and dock systems, ensuring a comprehensive level of service and maintenance.
- A clear and transparent service value determined in the initial service contract, with additional approval sought for any works outside the scope of this service.
- A hassle-free and convenient service experience that minimizes disruption to your operations and ensures the long-term efficiency, security, and environmental control of your facility.

Ulti Roll Door

HIGH SPEED FABRIC DOOR

Need an affordable option with world-leading tech?

This high speed, crash resistant, PVC fabric door rolls upwards and is designed for doorways with a continuous flow of traffic. High speed, crash resistant, reliable, easy clean and low maintenance the versatile Ulti-Roll door is a well-established Kiwi favourite, outperforming traditional door types in every industry.

✓ Highly Customisable

Ventilated options, multiple colourways, custom printing, and more.

✓ High Speed

Fast operation up to 2.5m/sec ensures the door remains open for the minimum time required to maximise productivity and decrease opportunities for contamination.

✓ Self-Repairing

High-tech guides that automatically refeed after accidents to prevent expensive downtime.

✓ Versatile

Due to its compact design and quiet operation the Ulti Roll Plus can be easily incorporated into restricted building clearances.

✓ Crash Resistant and Low Maintenance

Innovative curtain edge and track design allows for rapid movement, and with no metal parts in the curtain damage and downtime are kept to a minimum.

Ulti EX5 Door

ALL-WEATHER RAPID DOOR FOR INTENSE CONDITIONS

Need ultimate protection against the elements?

This is our fastest, toughest and most versatile rapid door, designed to provide protection against wind, rain and other weather extremes.

Ultra high speed with unrivalled tech, the Ulti EX5 maximises productivity and efficiency, minimises impact damage and can be used in the widest range of applications, both externally and internally.

✓ Ultra High Speed

One of the fastest doors available with opening speeds of up to 3m/sec for maximum productivity.

✓ Self-Repairing

Self-lubricating and self-repairing track with guides that refeed after accidents, preventing downtime.

✓ Highly Customisable

Available with insulated curtain options for temperature control, multiple colourways in sizes up to 10m wide, corrosion-resistant frames, and more.

✓ Unrivalled Tech

Class 5 wind resistance and next-gen curtain drive technology, utilising a reinforced track design and superior seals.

✓ Versatile

Maximum versatility for the widest range of applications, from harsh industrial environments to high-end laboratory airlocks.

Ulti Fold Door

HIGH SPEED FOLDING WAREHOUSE DOOR

Need a strong, rapid-acting door for a large opening?

This high speed, folding warehouse door provides the ultimate balance between size, strength and speed. Ideal for situations where frequent access is required in windy environments.

A simple, safe, smart solution to control larger openings internally or externally. The Ulti-Fold has adjustable photocells with a 20m range to detect traffic, maximising safety for personnel and vehicles.

✓ Large Span

Doors up to 10.5m wide and 8m high to turn large openings into responsive doorways.

✓ Immensely Strong

Designed to endure high winds, harsh storms and severe weather, preventing downtime.

✓ Highly Customisable

Available with mounting options, vision panels, multiple colourways, and more.

✓ High Speed

Fast operation up to 1.5m/sec opening speed to maximise productivity and save on energy.

✓ Versatile

For installation in warehouses, distribution centres, manufacturing facilities, printing companies, logistics companies, shipyards, 'big-box' retail, and more.

Ulti Komby Door

HIGH-PERFORMANCE SECURITY TWIN DOOR

Need maximum efficiency and ultimate security through one entranceway? With world-class speeds and innovative security features, we've combined the Ulti Roll high-speed door with our secure Shutter Door in one common frame. With fast opening speeds of up to 3m/sec, the Ulti Komby door will maximise productivity, decrease energy usage and give you peace of mind, knowing your team can remain productive while ensuring your facility remains secure.

✓ High Speed & Energy Saving

Premium insulation and fast speeds ensure maximum energy savings. Fast operation up to 2m/sec enables ultimate temperature control and reduced cycle times, maximising productivity.

✓ Versatile Applications

This unique combination of features makes the Ulti Komby Roll an ideal option for openings where traditionally slow-moving or manual door systems have been used.

✓ Security

Once the action has finished for the day, the high-security Ulti Komby Shutter is closed, providing peace of mind knowing your facility is protected against unauthorised entry and intruders.

✓ Crash Resistant

Features an innovative curtain edge, securely held in side guides. Reinforced PVC curtain with flexible weighted bottom edge ensures safety with no metal parts, minimizing damage.

Ulti Roll Bug Shield

ANTI INSECT PVC MESH DOOR

Do you want to keep insects and pests out of your facility while allowing fresh air to flow in? If so, you might be interested in the Ulti Roll Bug Shield door.

These insect preventative doors are made of heavy-duty vinyl coated mesh that blocks the entry of small bugs and larger pests, while also providing a visual barrier for security, and allowing the free flow of air through your facility. The Ulti Roll Bug Shield is ideal for manufacturing, and warehousing facilities that want natural ventilation and light, but need to maintain hygiene and safety standards.

✓ Self-Repairing

High-tech guides that automatically refed after accidents to prevent expensive downtime.

✓ High-Tech Safety Features

Laser detection and reversing sensor systems to minimise impacts and repairs

✓ Locally Produced in NZ

✓ High Speed

Fast operation up to 2.5m/sec ensures the door remains open for the minimum time required to maximise productivity and decrease opportunities for contamination.

✓ Highly Customisable

Multiple colourways, custom sizes.

Ulti Roll Food Door

HYGIENIC RAPID DOOR FOR FOOD PROCESSORS

Need a fast and hygienic door for your food processing facility?

This high-speed, crash-resistant, low-maintenance and washable PVC fabric door meets the stringent hygiene and wash-down requirements of the NZ food industry.

Available with a unique FDA-approved Food Grade PVC curtain, stainless steel frame and design features that prevent dust and liquid build-up, the Ulti Roll Food door is hygienic and fully washable, protecting your product from contamination.

✓ Hygiene Control

Meets the most stringent hygiene and wash-down requirements of the NZ food processing industry.

✓ Contactless Activation

For easy, glove-friendly use to prevent cross-contamination and increase productivity.

✓ Crash Resistant and Low Maintenance

Innovative curtain edge and track design allows for rapid movement, and with no metal parts in the curtain, damage and downtime are kept to a minimum.

✓ High Speed

Fast 2.5m/sec speeds ensure the door remains open for the minimum time required to maximise productivity and decrease opportunities for contamination.

✓ Space Saving

Compact, innovative design uses significantly less floor and wall space than traditional hinged or sliding doors.

Ulti Roll Car Wash Door

WATER-RESISTANT HIGH SPEED DOOR SYSTEM

Need a premium door for wet environments?

This high-speed, PVC curtain door is designed for car washes or any application that sustains regular contact with water and wash-down chemicals.

With a high wind load rating and compact design, the Ulti Roll Car Wash door is exceptionally durable and designed to withstand harsh outdoor environments

✓ Superior Resistance

Resistant to water and oxidation, and available with a stainless steel frame as standard, this door is easy to keep clean and looking sharp.

✓ Robust Durability

Innovative PVC curtain edge and track design allows for rapid movement with no metal parts, keeping damage and downtime to a minimum.

✓ Customisable

Available in multiple colourways with many upgrade options, including vision panels, enhanced safety features and more

✓ High Speed

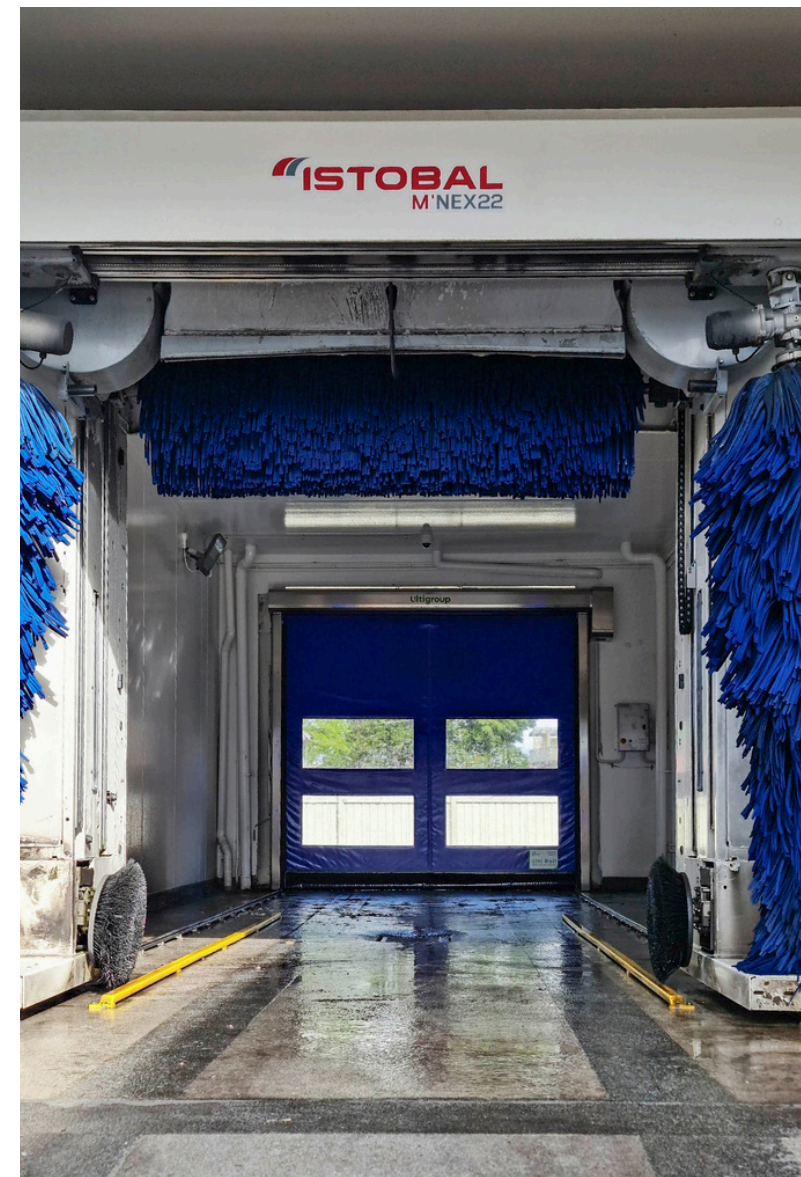

Fast 2.5m/sec opening speeds maximise productivity, minimise impact damage and save on energy costs.

✓ Self-Repair

An innovative door curtain release system enables easy restoration following accidental impacts.

✓ Kiwis for Kiwis

Locally produced in NZ.

Ulti Roll Clean Door

HYGIENIC ANTI-DRIP RAPID DOOR FOR FOOD PROCESSORS

Need a fast and condensation-proof door for your food processing facility?

This high-speed, crash-resistant, low-maintenance and washable PVC fabric door meets the stringent hygiene and wash-down requirements of the NZ food industry.

The Ulti Roll Clean is fully wash-down capable with stainless steel construction and a sloped hood with integrated anti-drip draining channel designed to prevent condensation and water from dripping down from the hood or door curtain into the doorway and spoiling your food product.

✓ Hygiene Control

Meets the most stringent hygiene and wash-down requirements of the NZ food processing industry.

✓ Anti-Drip Drain

The product has an innovative design that stops water from forming and dripping on the food products, ensuring hygiene and quality.

✓ Crash Resistant and Low Maintenance

Innovative curtain edge and track design allows for rapid movement, and with no metal parts in the curtain damage and downtime are kept to a minimum

✓ High Speed

Fast operation up to 2.5m/sec ensures the door remains open for the minimum time required to maximise productivity and decrease opportunities for contamination.

✓ Good seal for environmental control

The product has a zipper edge that creates a well-sealed door, preventing air leakage and maintaining the optimal temperature and humidity for food production.

Ulti Roll Air Door

ENVIRONMENTAL CONTROL DOOR SYSTEM

Need to separate two high-traffic areas with different temperatures and humidity? This high speed, PVC curtain door with integrated air curtain delivers exceptional value and can be configured for almost any application. With fast opening speeds and multiple upgrade options, the Ulti Roll Air outperforms traditional door types in every industry, with an integrated, lateral ventilation system that guarantees environmental separation eliminating the transfer of bugs, dust and debris ensuring your product and plant is protected

✓ Crash Resistance

Innovative PVC curtain edge and track design allows for rapid movement with no metal parts, keeping damage and downtime to a minimum.

✓ Self-Repair

An innovative door curtain release system enables easy restoration following accidental impacts.

✓ Customisable

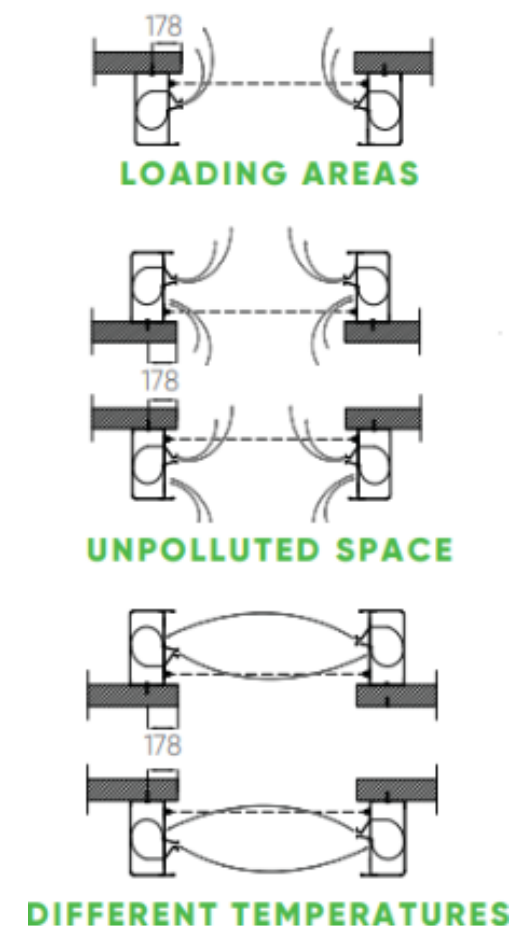

Compact, customisable design available in multiple colourways with many upgrade options, including full-width vision panels, ventilation panels and more.

✓ High Speed

Fast 2m/sec opening speeds (with options to increase to up to 3m/sec), maximises productivity, minimises impact damage and saves on energy costs.

✓ Versatile Applications

Ideal for use in chilled/heated areas, food hygiene facilities, airlocks, laboratories, warehouses, manufacturing facilities, logistics and more.

Ulti Frigo 2 Door

HIGH SPEED DOUBLE INSULATED FREEZER DOOR

This ultra-fast curtain door outperforms all traditional freezer doors and is perfectly suited to any application requiring an enhanced level of insulation and energy efficiency. At the heart of the Ulti Frigo 2 door is a revolutionary design with two high-speed curtains rising together and an air pocket between them. Treated air is emitted into the space between the curtains to create an effective insulation layer and prevent temperature transfer.

✓ High Speed

Fast 1.8m/sec opening speed to maximise productivity and save on energy.

✓ Knockout Feature

If forklifts hit the curtain it will knock out of its zips and repair itself on the next cycle, so the door sustains no damage.

✓ Thermal Resistance

Providing insulation from -25°C to +50°C.

✓ Highly Customisable

Compact design with upgrade options and multiple colourways to suit many unique applications.

✓ Versatile

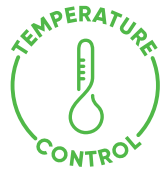

Suitable for installation in warehouses, manufacturing facilities, supermarkets, chilled areas, and more.

✓ Kiwis for Kiwis

Locally produced in NZ.

Ulti Frigo 2 Air Door

DOUBLE-INSULATED DOOR WITH INTEGRATED AIR CURTAIN

This compact, double-insulated door system combines the benefits of the standard Ulti Frigo 2 with an air curtain in one common frame. When the door is open, the integrated air curtain system controls the transmission of warm/moist air across the doorway, almost eliminating ice build-up. When closed, the dual curtain design creates a dead air space filled with treated air for ultimate insulation.

✓ Next-Generation Design

Eliminates ice build-up and outperforms all traditional freezer door types.

✓ Low Maintenance

Innovative track design allows the curtains to unzip from the guides after accidental impacts. Curtains re-feed automatically to minimise downtime.

✓ Ultimate Thermal Performance

With applications across almost any entrance, from a -35°C cold storage to high humidity ELAs.

✓ High Speed

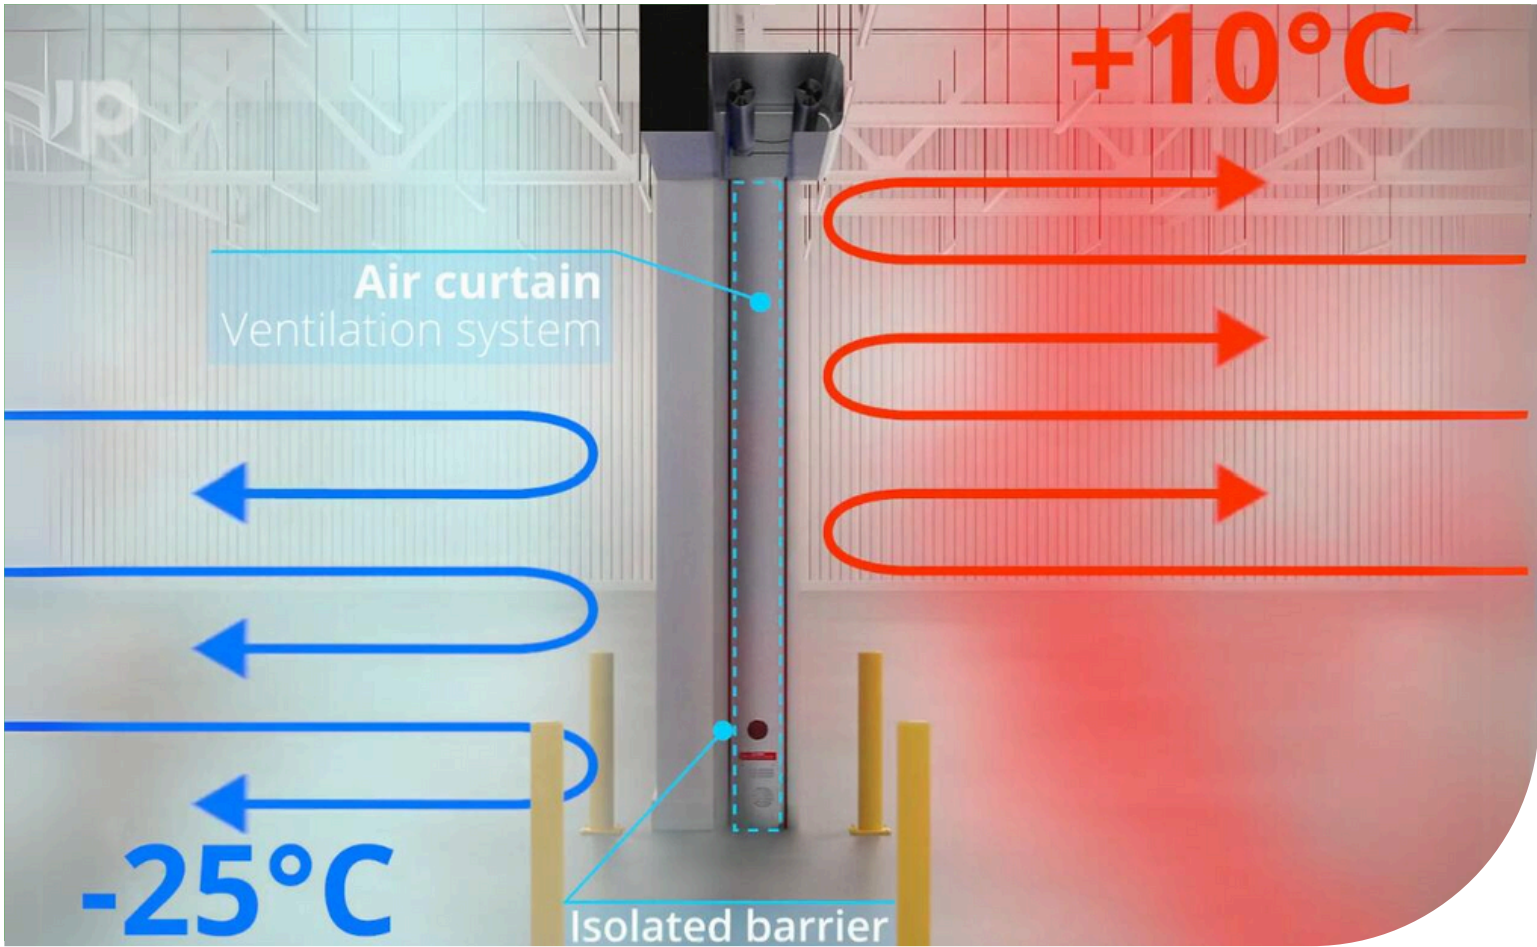

Rapid 1.8m/sec opening speeds to maximise productivity and minimise the chance of impact damage.

✓ Versatile Applications

Compact design for restricted building clearances. Ideal for use in the refrigeration industry, heated facilities, supermarkets, freezer openings and more.

✓ Highly Customisable

Multiple upgrade options allow ultimate flexibility across multiple industries/applications.

Ulti Frigo 2 Blast Door

DOUBLE-INSULATED BLAST FREEZER DOOR.

Protect your people and products with this compact and energy-saving design. During blast cycles, the Ulti Frigo 2 Blast's innovative double curtain creates a tight seal against high pressure, with a treated air gap between them for ultimate insulation.

✓ Compact Design

For restricted building clearances and maximising valuable floor space.

✓ Improves Safety

Eliminates ice build-up, reducing the risk of harm to personnel.

✓ Thermal Insulation

Innovative double-insulated curtain system to withstand pressure extremes and maximise thermal efficiency.

✓ Enhanced Productivity and Durable

Fast opening times improve site efficiencies while reducing ice build-up and energy costs. Ideal for use in extreme and high-pressure environments

✓ Low Lifetime Cost

Innovative track design provides fewer maintenance issues and less downtime.

Ulti Fastrax FR Door

HIGH SPEED FREEZER DOOR

Need a high speed freezer door with unbeatable insulation and impactability?

This fast and effective insulated door will save you energy and outperform all other models on the market with its unrivalled, world-class features.

With the tightest and most reliable thermal air seal, the largest variety of track configurations and a patented self-repair feature, the Fastrax FR is guaranteed to improve your operations.

✓ Thermal Performance

Strong insulated curtains reduce energy costs, eliminate ice build-up and reduce defrost cycles to guarantee savings.

✓ Adaptable Track Design

Multiple configuration options allow doors to fit almost any application, with fewer costly building modifications.

✓ Durable

Designed for harsh environments and high-use areas with the ability to sustain multiple impacts and keep operational to ensure longevity.

✓ High Speed

One of the industry's fastest freezer doors, with a rapid 2.5m/sec opening speed to maximise productivity and save on energy costs.

✓ Versatile

Ideal for use in freezers, chillers, environmental load-out areas, warm rooms, conveyor openings, and more.

Ulti Flex Door

HIGH PERFORMANCE BI-PARTING FREEZER DOOR

This speedy, rugged and energy-saving door is the benchmark for cold storage doorways. Low maintenance, with opening and closing speeds of up to 2m/s, the Ulti Flex Bi-Parting door is one of the fastest insulated freezer doors available. Quick operating speeds maintain temperature control and reduce cycle times to maximise productivity and energy savings.

✓ High Speed

Fast <2m/sec speeds enable ultimate temperature control and reduced cycle times, maximising productivity.

✓ Safety Where it Matters

Reduced ice and moisture build-up ensures safer, dryer floors to protect your people and products.

✓ Versatile Applications

Ideal for use in cold stores, freezer rooms, logistics facilities, distribution centres and more.

✓ Energy Saving

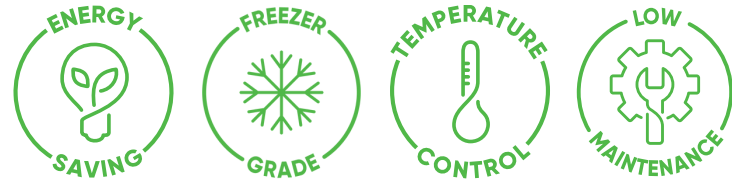

Premium insulation and fast speeds ensure maximum energy savings.

✓ Low Maintenance

Innovative panels designed to flex can return to position after accidental collisions, meaning fewer maintenance costs and less downtime.

Ulti HCR Air Door

HIGH-VELOCITY RE-CIRCULATORY AIR DOOR

Need a better solution for moving traffic through cooler and freezer doors?

Ulti Air Doors create a horizontal curtain of high-velocity recirculatory air across the entire opening of an entranceway, forming an effective barrier, maintaining environmental control without inhibiting access for staff and customers.

Available in a range of models to suit your requirements, Ulti Air Doors provide an energy-efficient way to create an invisible barrier that controls air temperature differences and prevents ice, fog, and moisture build-up.

✓ **Superior Temperature Control**
With models available to suit even the most demanding environments.

✓ **Enhanced Productivity**
With no physical barriers and no moving parts, movement and productivity increases.

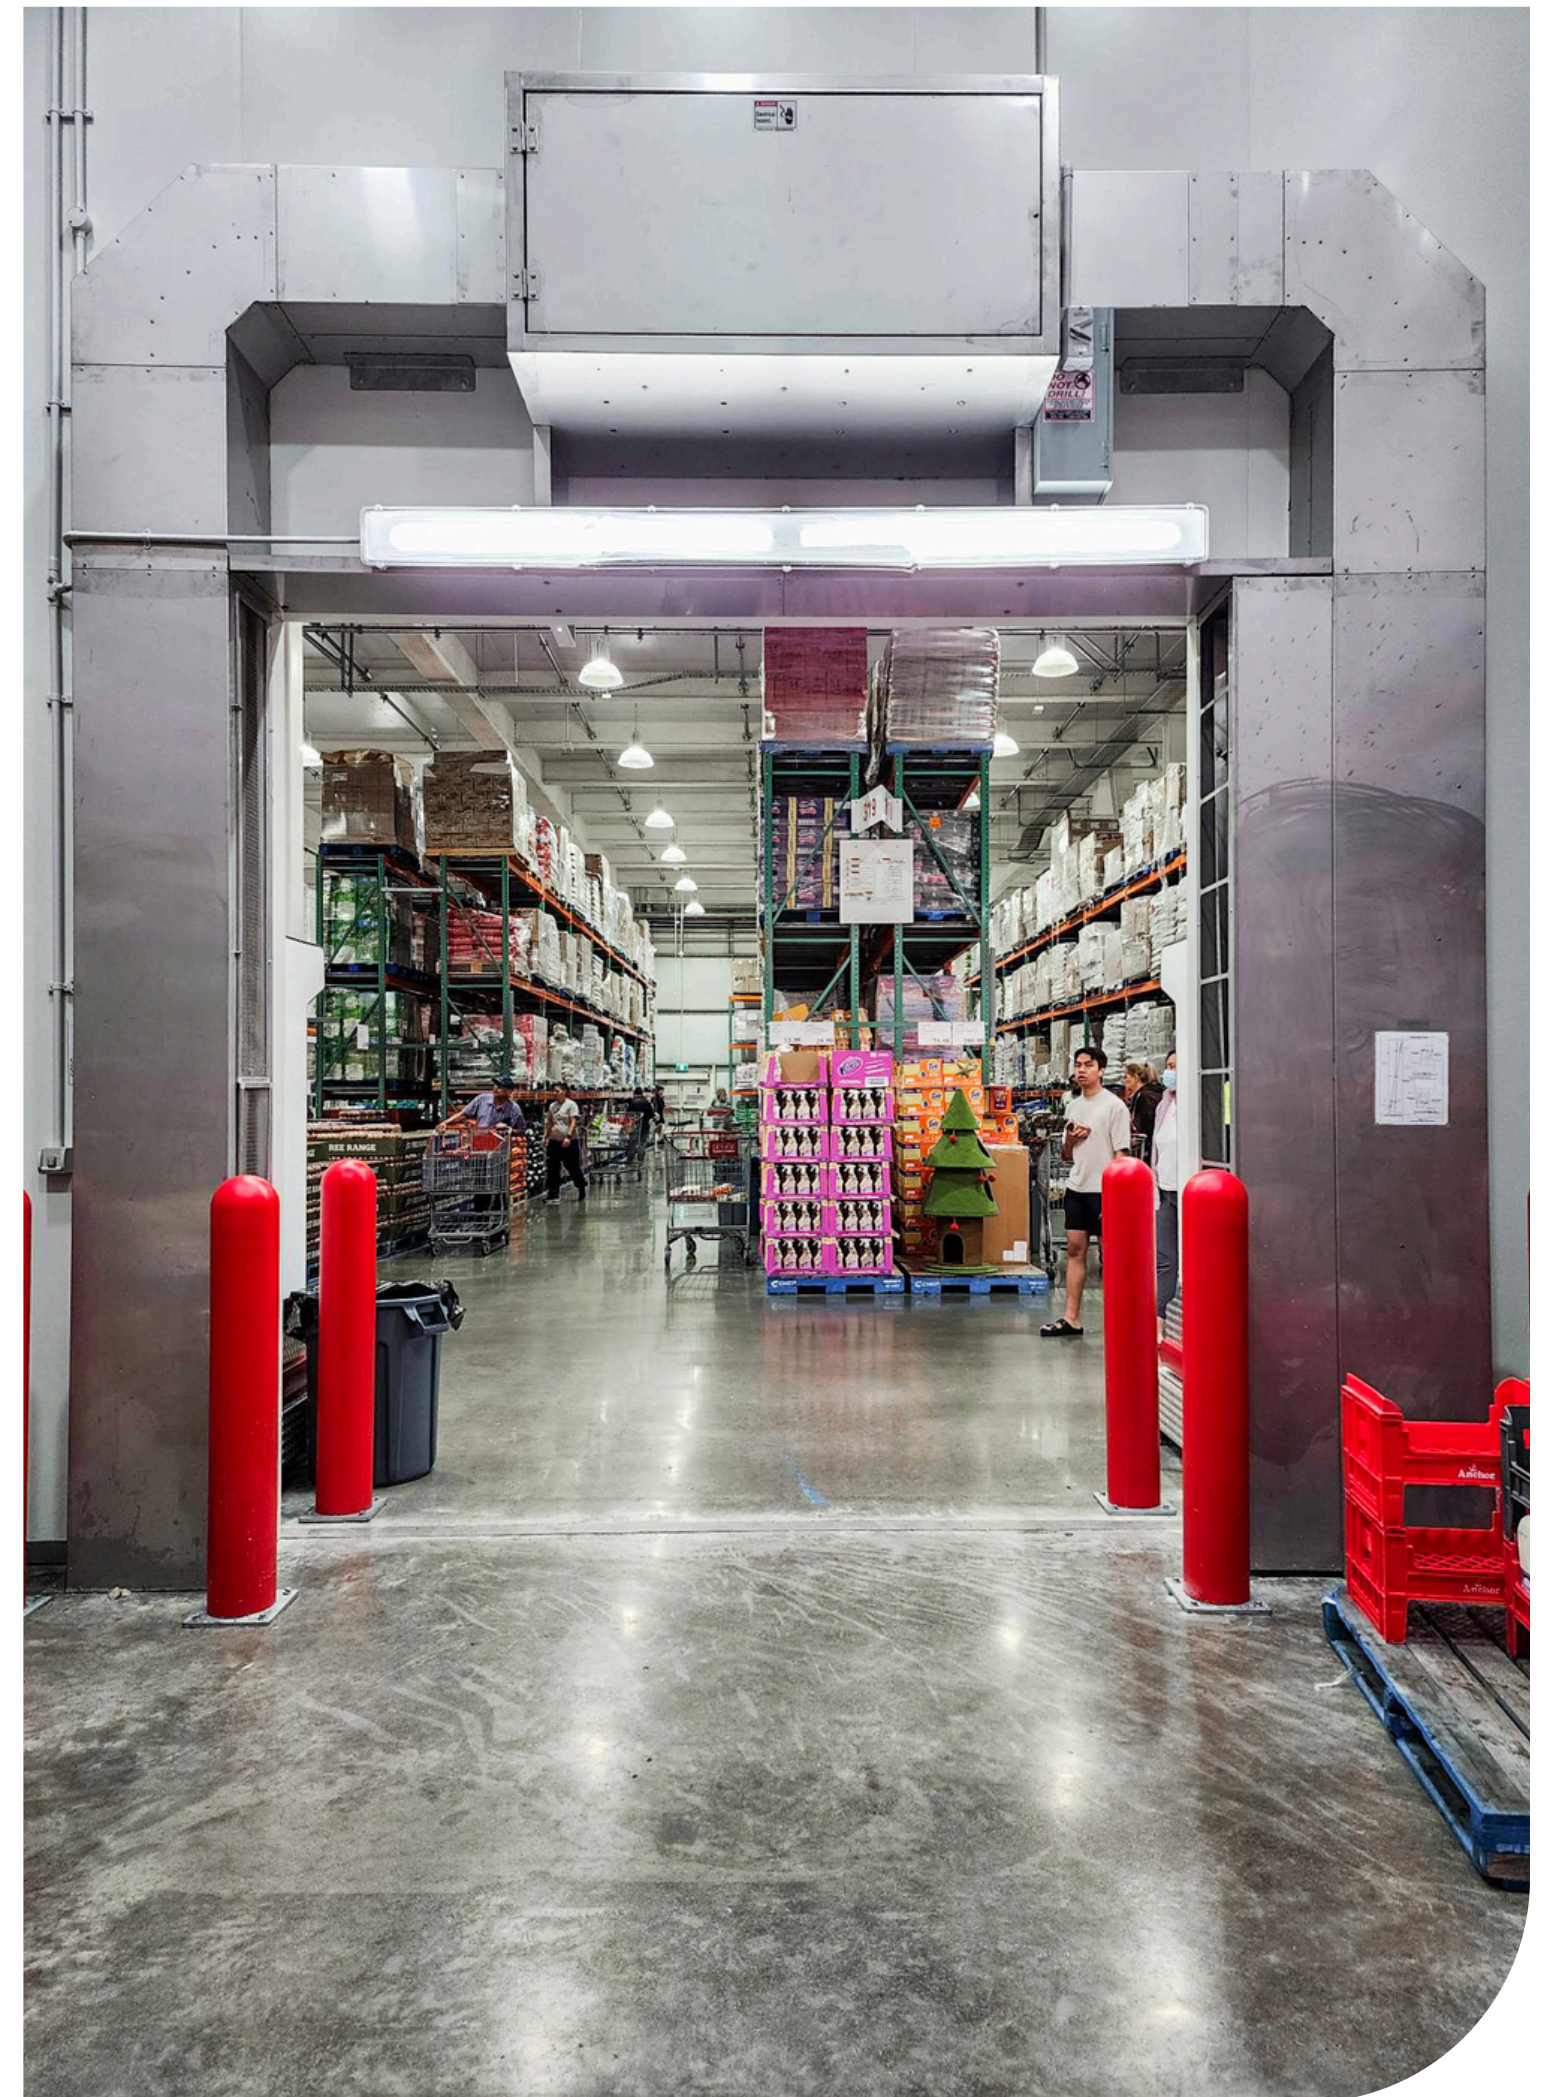

✓ **Energy Savings**
Consistent temperature control reduces energy loss and extends the shelf-life of products.

✓ **Lower Construction Costs**
Buildings can be designed without vestibules, lowering construction costs and creating more available floor space.

✓ **Environmental Control**
High-velocity air barrier prevents insects, dust, dirt and fumes from entering your facility.

✓ **Versatile Application**
Ideal for food distribution centres, food processing plants, refrigerated warehouses, retail grocery stores and more.

✓ **Enhanced Safety**
Dramatic removal of frost and ice in cold storage facilities ensures personnel are more protected.

Ulti Spiral Door

HIGH SPEED INSULATED SPIRAL DOOR

Need a fast, high performance door to maximise security?

This high speed security door is great for internal and external applications and has an ultra-fast cycle time to maximise productivity. Versatile with options for customisation, the Ulti Spiral is a great multi-use solution for a wide range of applications. Available with solid panels for insulation, ventilated panels for airflow and clear vision panels for useability.

✓ Insulated

Foam-filled, double-skinned steel slats to maximise thermal efficiency and save on energy costs.

✓ High Speed

The quickest speeds in the spiral door industry with up to 2m/sec opening time to maximise productivity.

✓ Low Maintenance

Unique patented design and a counterweighted drive system to provide fewer maintenance headaches and more reliability.

✓ Durable

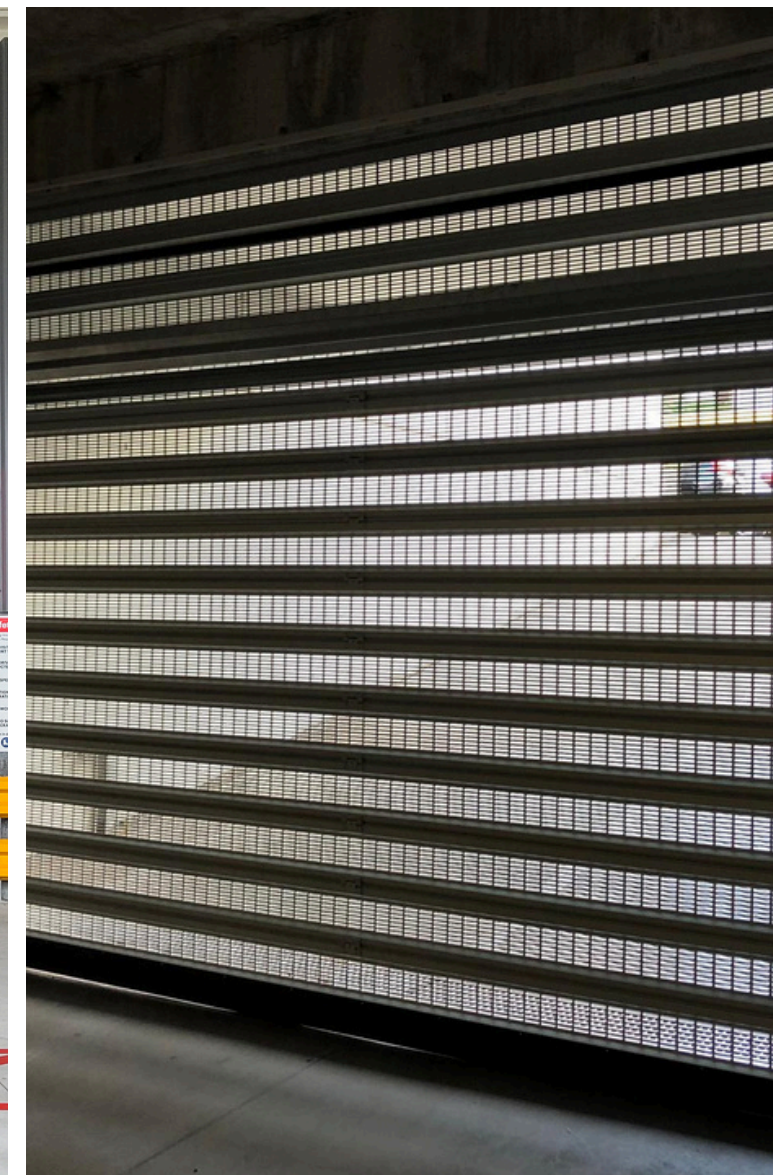

Non-contact roll-up technology ensures no additional wear on the door sections and helps keep the door panels clean.

✓ Safe and Secure

Robust design with high-tech sensors to protect personnel, vehicles and objects from the closing zone.

✓ Versatile

Ideal for use in food-grade warehousing, manufacturing facilities, secure institutions, airports, government or embassy facilities, car parks, and more.

Ulti Spiral Cold Door

INSULATED VERTICAL LIFT SPIRAL DOOR

This durable, low-maintenance door provides high-performance thermal insulation in the harshest of cold storage environments.

Ideal in freezer applications with the assurance of long-term reliability, the Ulti Spiral Cold door is one of the fastest super-insulated shutter doors available, reducing cycle times and energy costs whilst maximising productivity.

✓ Thermal Insulation

Innovative 80mm thick foam-filled, dual-wall slats maximise thermal efficiency.

✓ Energy Saving

Premium insulation and fast speeds ensure maximum energy savings. Suited for blast freezers within coldrooms.

✓ Low Maintenance

Innovative, patented design features mean less moving parts, fewer maintenance headaches, more reliability and an exceptional life span.

✓ High Speed

Fast <2m/sec speeds reduce cycle times and maximise productivity.

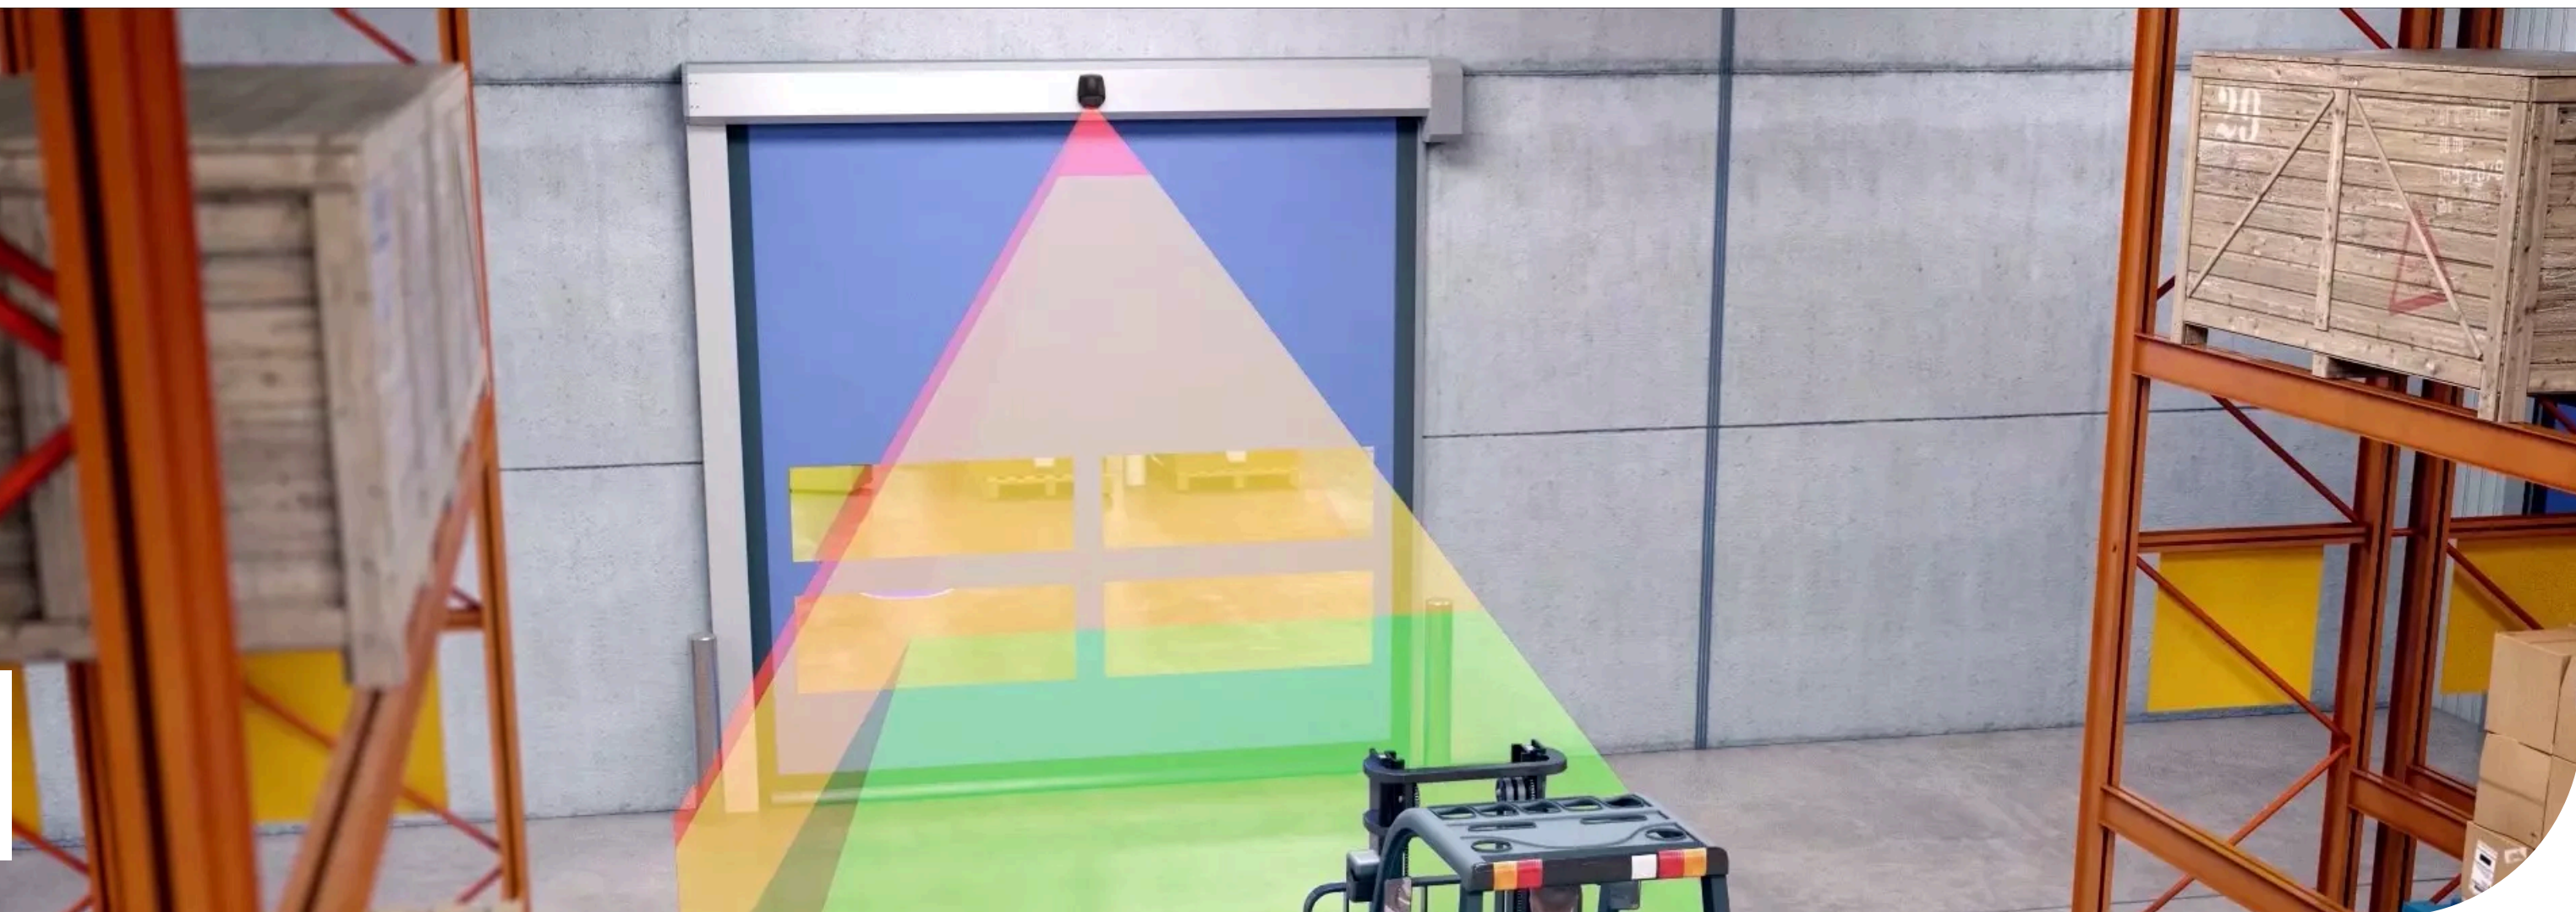

✓ Enhanced Security

Intruder-proof features to protect your facility.

✓ Enhanced Safety Features

High-tech safety sensors protect personnel, vehicles and objects from the closing zone, reversing the door if light beams are interrupted.

Door Activation Systems

SENSORS AND RADARS FOR AUTOMATED DOORS

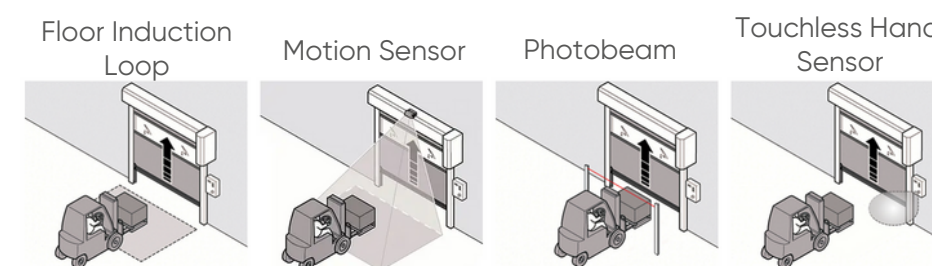

Want to increase efficiency in your team?

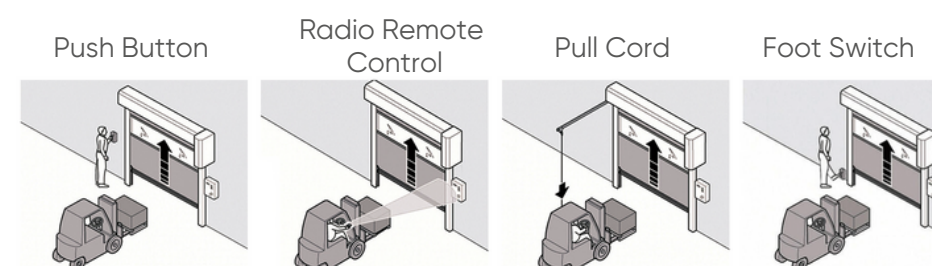

Install a Door Activation System such as motion sensors, radars, pull cords, push buttons and forklift remotes.

Door Activation Systems give you the ability to increase productivity by allowing personnel and traffic to move through your doorways with speed and ease, decreasing costs associated with damage and false cycles, and improving doorway safety on your site.

✓ TOUCHLESS ACTIVATIONS

✓ MANUAL ACTIVATIONS

Door Visual Warning System

TRAFFIC SAFETY LIGHTING

Ulti Virtual Vision

With a combination of motion sensors and flashing lights, Virtual Vision alerts personnel to hidden movement on the opposite side of the doorway. Green lights indicate when no movement is detected. Red lights flash to indicate the need for caution.

Options

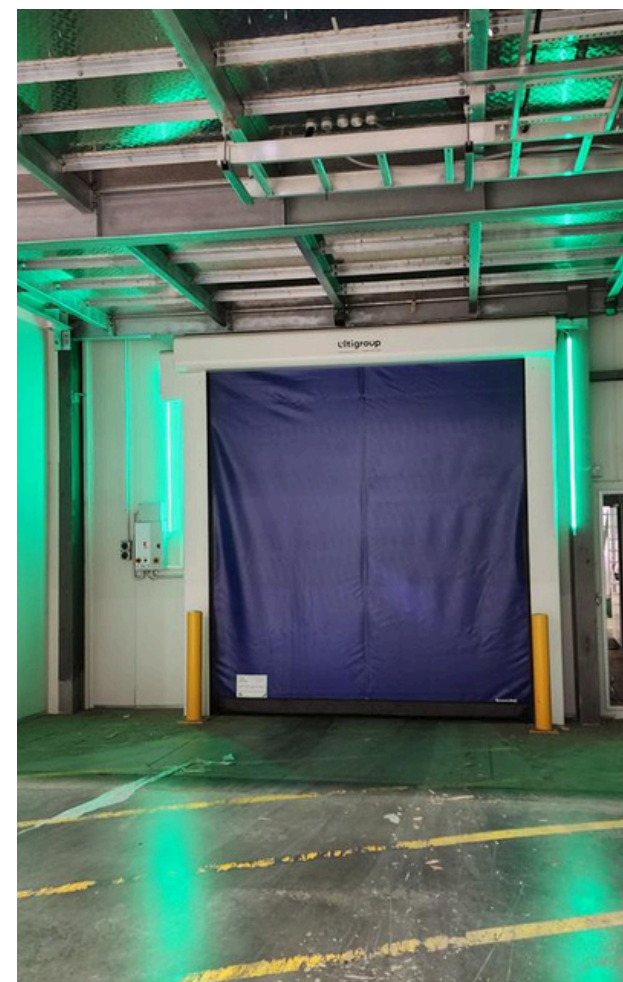

High-tech sensors detect movement to help protect your personnel.

Dimensions

1700mm standard length, with custom options available

Safety First

Ideal for use in doorways/openings where visibility is reduced, hidden corners and doors without vision panels.

LED Preannounce

Flashing LED lights on both sides of the door ensure personnel know when it's safe to pass through. Lights flash red when the door is opening/closing and turn green when the door is fully open.

Activation Detection

Lights flash when the door is activated to help protect your personnel.

Safety First

Ideal for doors without vision panels, Ulti Roll variants, Ulti Frigo 2, Ulti Spiral, Ulti Flex, Ulti Fold Value, Ulti Komby, Ulti EX5.

Dimensions

1000mm standard length, with a lifetime rating of 50,000 hours..

Safety LED Push Button

Large, round LED push buttons are used to activate the door. When activated, the button flashes red when the door is opening/closing and turns green when the door is fully open.

Activation Detection

Lights flash when the door is activated to help protect your personnel.

Safety First

Ideal for use with Ulti Roll variants, Ulti Frigo 2, Ulti Spiral, Ulti Flex, Ulti Fold Value, Ulti Komby, Ulti EX5.

Dimensions

90mm diameter, mounted in place of standard push buttons.

PVC Strip Curtain Kits

CUSTOM MADE CURTAIN FOR AMBIENT/COLD TEMPERATURES, WELDING AREAS AND PEST PREVENTION

Our PVC strip curtains cater to various needs and environments, ensuring effectiveness and durability.

Firstly, the standard PVC strip curtain kit is perfect for internal or external pedestrian doorways with high traffic volumes. It acts as a barrier against noise and air pollution while effectively controlling ambient temperatures between different areas.

Secondly, the welding grade PVC curtain is designed for arc welding areas. It minimises the risk of 'welding flash' to nearby employees, ensuring a safer work environment.

Thirdly, the anti-insect PVC strip curtain, coloured translucent yellow and infused with oil of citronella, deters flying insects. This curtain is ideal for busy pedestrian doorways, offering noise and air pollution barriers and efficient temperature control. Customise by inputting door measurements to calculate the appropriate number of strips, complemented by our durable stainless steel hanging system for easy installation.

Lastly, the freezer grade PVC strip curtain is specifically engineered for cold rooms, chillers, and walk-in fridges. It maintains temperature control and minimises conditioned air loss, withstanding extreme temperatures from -55°C to $+25^{\circ}\text{C}$.

Ulti Roll Entry Door

COMPACT SPEED DOOR FOR INTERIOR SPACES

Need a fast, compact personnel door to replace your traditional hinged and sliding doors? This premium PVC curtain door is high speed, low maintenance, customisable and simple to use. With a compact, space-saving design, the Ulti Roll Entry door is ideal for hallways and narrow spaces. Quiet, with easy activation at the touch of a button, this door is durable, low maintenance and available with custom options for printing and contactless activation.

✓ Space Saving

Ultra-compact with integrated motor and control panel. Requires minimal floor and wall space, ideal for narrow areas, hallways, or doorways. Smart choice for space optimisation.

✓ Quiet

The brushless motor ensures a very quiet operating, perfect for low-noise environments such as office/retail applications and hallways.

✓ Customisable

To suit your needs from designating areas within your facility, to promoting your brand. Should you need to relocate the door or change the curtain design, it is also simple to move the whole unit or simply replace the curtain for reduced downtime and costs.

✓ Low Maintenance

Auto-refeed slots allow the door curtain to reinsert itself in the guide after being impacted, meaning less maintenance, less downtime, and reduced costs.

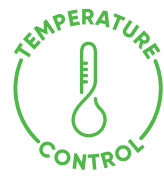

✓ Easy Activation

With a simple, one-touch control button, the Ulti Roll Entry is easy and convenient to use. An optional contactless activation can be applied helping to eliminate the transfer of bacteria for ultimate hygienic and sanitary operation

2400 Series PVC Swing Door

PVC CRASH-THROUGH SWING DOOR

Need a hard-wearing PVC swing door for a high-use area?

This crash-through, PVC swing door is a hard-wearing solution for busy accessways, allowing travel from both directions. The 2400 series swing door is a durable and efficient solution for busy openings, providing constant access for personnel while enhancing safety and environmental control.

✓ Crash Through

The very robust construction of these doors allows both forklift traffic and personnel to pass through in either direction at any time.

✓ Long-life

Due to the very robust hardware, including lubrication-free nylon bearings, these doors endure constant harsh usage

✓ Cleanability

Every component of the 2400 series doors is easily cleanable ensuring hygiene and visual aspects are easily maintained

✓ Aesthetic Screening

It has anodised aluminium frames and a selection of attractive optional solid colour choices that can be added to the main PVC panels providing appropriate privacy

✓ Environmental Control

The door leaves' spring-loaded operation ensures only the minimum required area for traffic pass-through is used

4500 Series Swing Door

CRASH-THROUGH THERMAL SWING DOOR

Need a robust swing door for a high-use area?

This crash-through, insulated door is a good-looking and hard-wearing solution for busy accessways, allowing travel from both directions.

Offering customisable design with attractive, lightly-textured flat panels and anodised aluminium frames, the durable 4500 Series doors are built for quality and durability.

✓ Thermal Traffic Door

Utilising a unique insulated panel and robust seal system these doors are a long-proven solution for busy openings allowing free access through the door in both directions.

✓ Cleanability

Every component of the 4500 series doors is easily cleanable ensuring hygiene and visual aspects are easily maintained.

✓ Long-life

The very robust panel system is constructed from rotational moulded polyethylene outer then high-density foam filled and cured to provide exceptional thermal and noise insulation properties

✓ High Quality Aesthetic

The quality look these doors provide allow application in high end retail environments and any other area requiring discreet access around busy public areas.

✓ Crash Through

Heavy duty spring mechanisms continuously reset the doors to their closed position at all times. Impact release shear pins ensure no damage to the door or surrounds if the frame is accidentally impacted.

Ulti PA Door

PERSONNEL ACCESS DOOR

Need a strong, secure personnel door that's lightweight and durable?

Each door is custom-made to suit a wide range of industrial settings.

Especially suited to exterior situations, the Ulti PA Door is ideal for secure storage, commercial or multi-tenant buildings and for use as fire-escape / egress doors.

✓ Strong and Lightweight

Strong, quality parts, combined with a lightweight aluminium honeycomb core, ensure high-impact resistance and superior strength.

✓ Customisable

Available in a range of colours and a variety of panel designs, including glazed and louvre options.

✓ Optional Frame

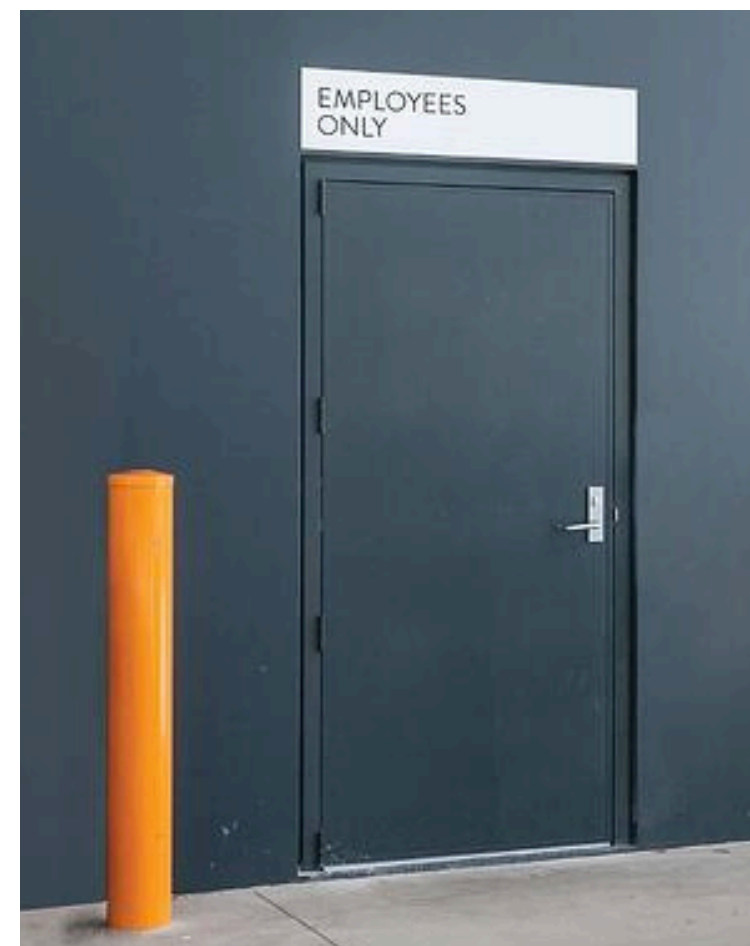

Can be supplied with a 40mm industrial door frame, complete with door infill and sill.

✓ Secure

Durable aluminium cladding and a sturdy locking system provide enhanced security.

✓ Versatile Application

Ideal for use in high-security areas, storage rooms, fire escapes, thermal environments, commercial buildings, engine rooms and more.

Panoramic Glazed Sectional Door

FULL VISION GLAZED SECTIONAL DOOR

Need natural light and full visibility?

This modern-style, customisable, double or triple-glazed door allows its maximum surface area to be used as a window.

For internal or external use, the Panoramic Glazed Sectional door has enhanced thermal performance and is built to exceed AS/NZS safety standards. Uniquely customisable with replaceable panels, this door can be adapted to achieve your own visual aesthetic.

✓ High-Tech Safety Features

Stress tested and built to exceed AS/NZS standards.

✓ Highly Configurable

Multiple automation and safety systems are available, including high speed operation.

✓ Thermal Efficiency

Robust seals for enhanced thermal performance. Suitable for installation in controlled environments, whether cooled or heated.

✓ Customisable Design

Transparent or translucent double or triple glazing, coloured glass options, microline insulated panels and more.

✓ Versatile

Suitable for installation in vehicle showrooms, maintenance workshops, retail environments, convention centres, government services, airports and more.

Stacking Sectional Door

COMPACT SECTIONAL DOOR

Need a space-saving door that can be custom-built to your own specifications?

This compact and versatile sectional door has a unique folding system that ensures it can be installed where traditional industrial doors will not fit.

With an extensive range of colours, window/vision choices and multiple automation and safety systems available, each panel of the Ulti Stacking Sectional door can be configured to your unique requirements.

✓ Compact Design

No ceiling rails and a unique folding system ensure this door can be installed in buildings with ceiling lights, crane tracks, sprinkler installations, sloped roofs and more.

✓ Low Maintenance

Innovative, durable design features, without balancing springs, reduce maintenance issues and costly downtime.

✓ Highly Customisable

With multiple automation and safety systems available, as well as multiple colourways, window glazing and vision panel options.

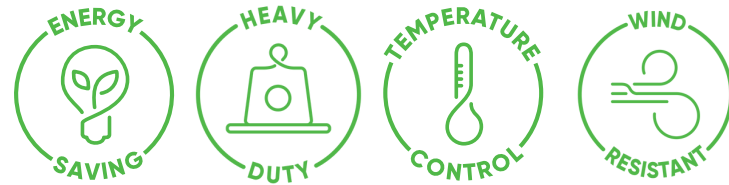

✓ Versatile Applications

Ideal for use by emergency services, automotive industries, warehouses, distribution centres, manufacturing facilities, showrooms, airports and more.

Insulated Sectional Door

PREMIUM INSULATED SECTIONAL DOOR

Need an energy-saving door for controlled environments?

Combining enhanced sound and thermal insulation with clean and modern design, this sectional door is ideal for locations where insulation is particularly important.

Providing optimum energy management for controlled environments – chilled or heated – our Insulated Sectional Door is highly customisable to suit your unique application.

✓ Thermal Performance

Full perimeter seals, thermal breaks and a high-density panel core enhances thermal performance.

✓ Highly Customisable

With multiple automation and safety systems available, as well as multiple colours, window glazing and vision panel options.

✓ Sound Isolation

Tested and certified for world-class performance.

✓ Energy Saving

With U-values down to 0.68W/m²K, it ensures optimum energy efficiency. 40mm, 60mm and 80mm thick insulated panel options.

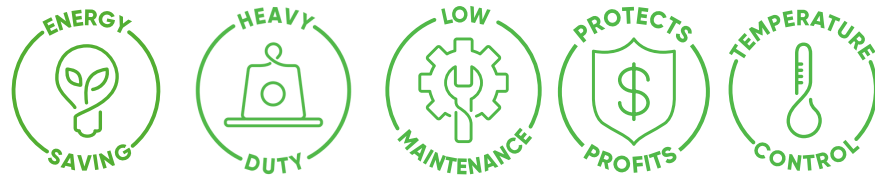

✓ Versatile

Suitable for installation in warehouses, logistics companies, distribution centres, manufacturing facilities, airports, military applications and more.

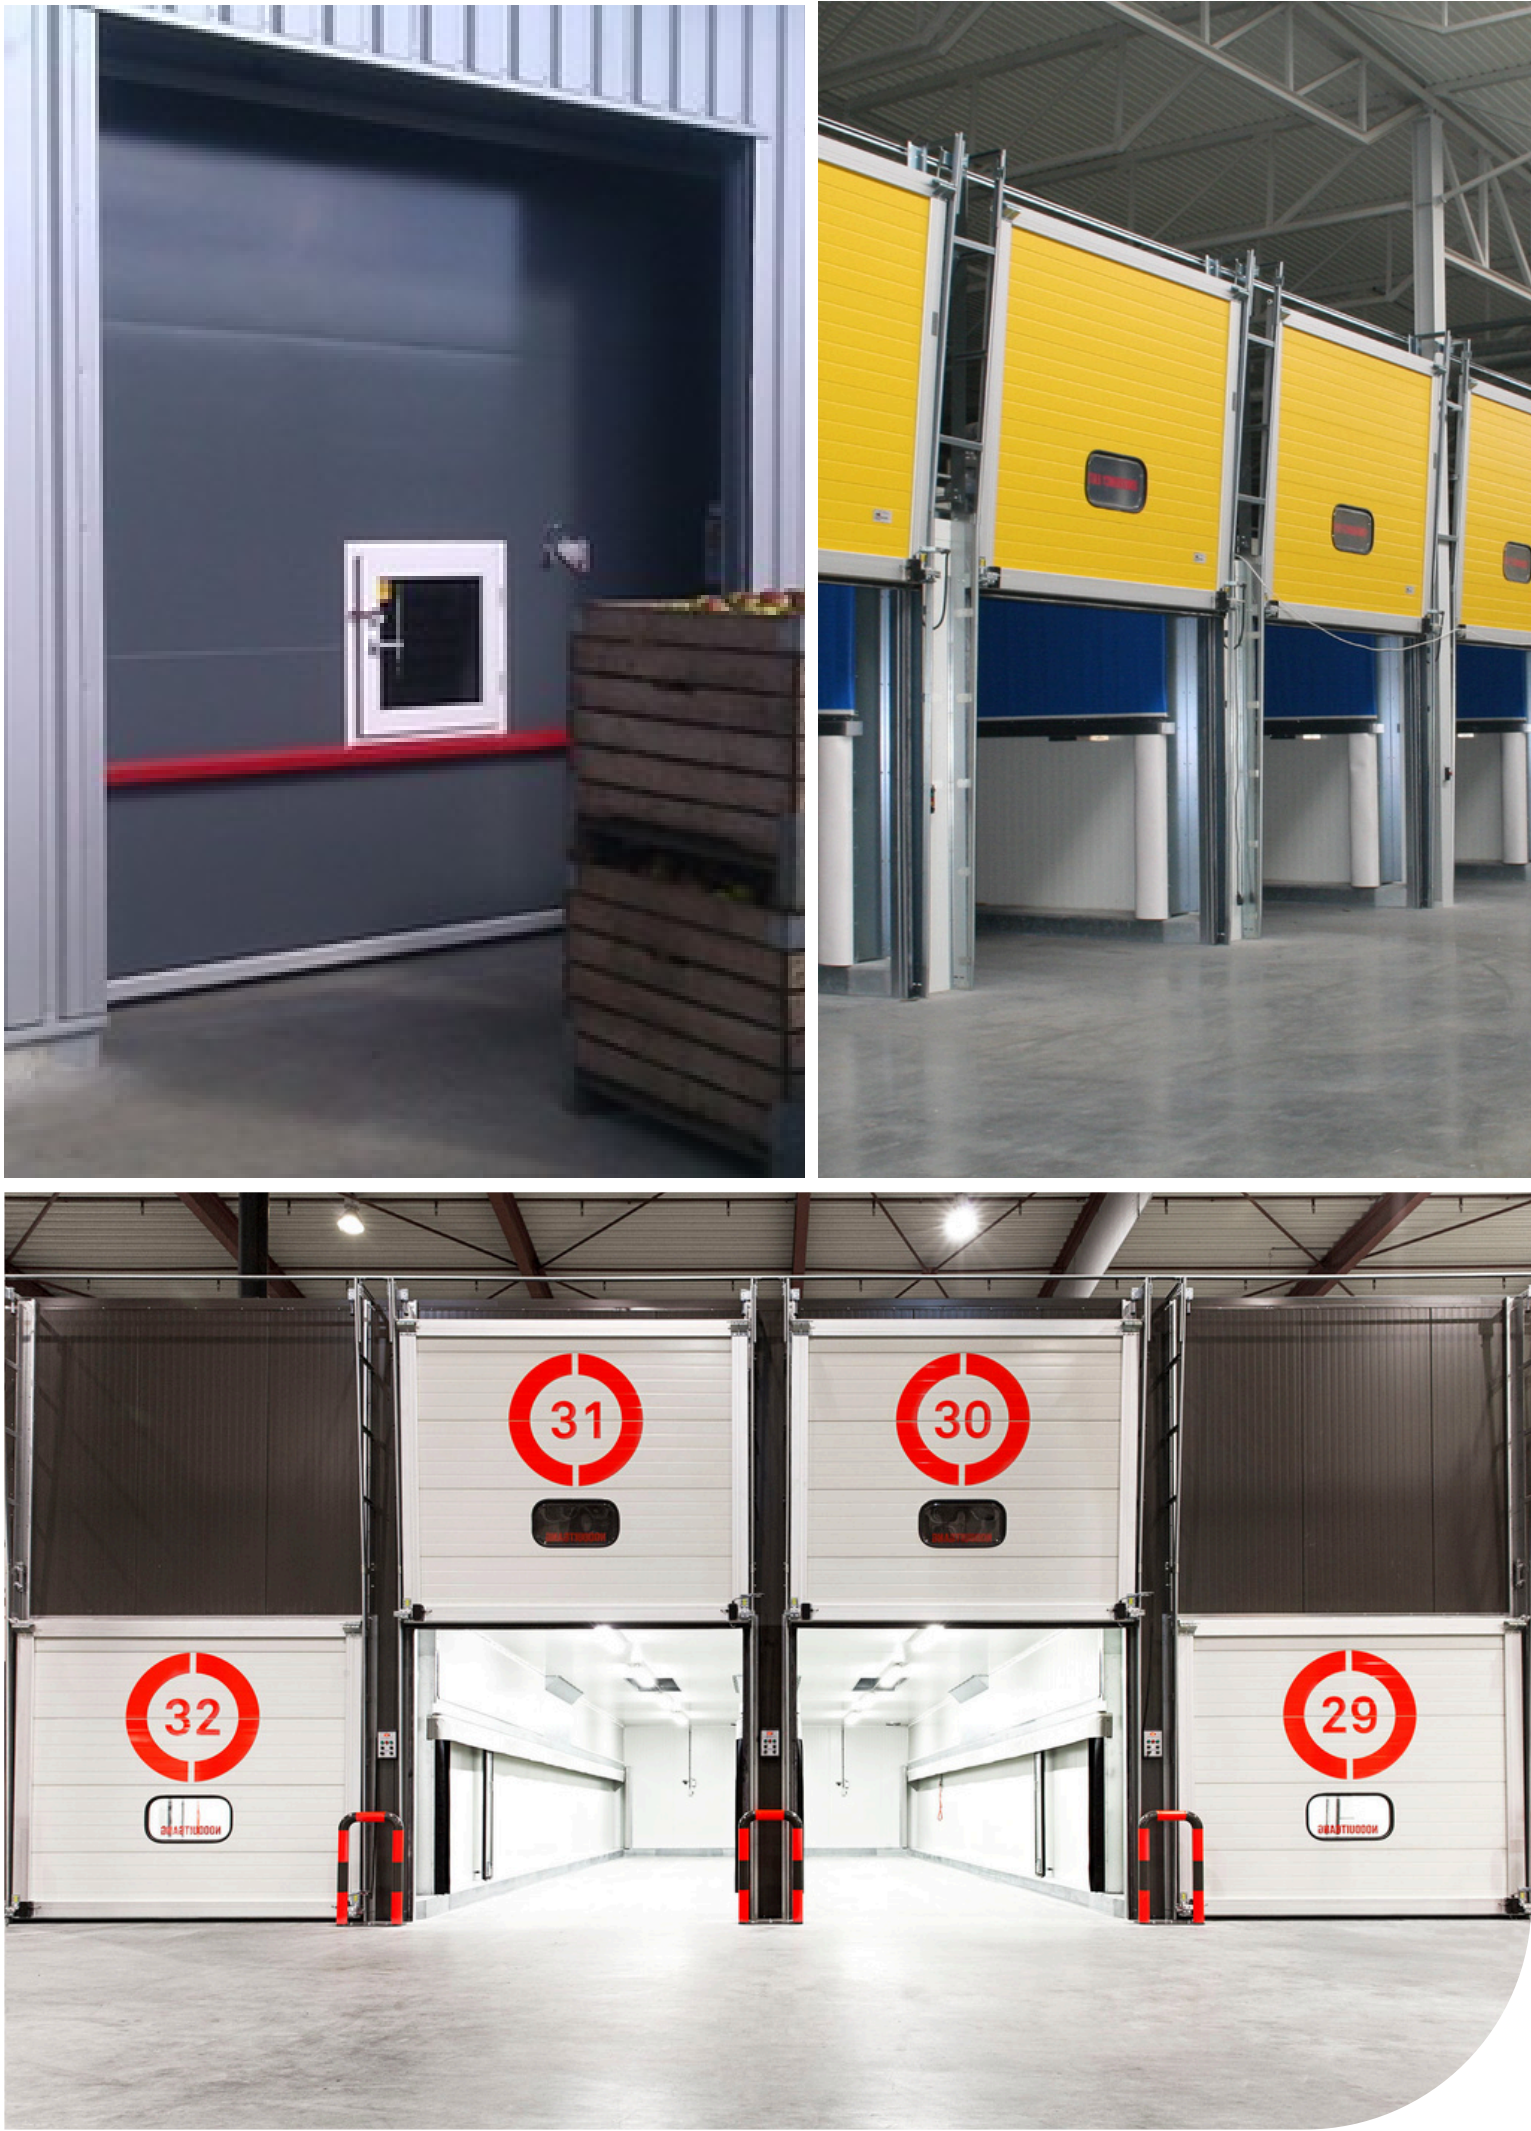

Controlled Atmosphere Door

GAS-TIGHT DOOR SYSTEM

Need to store your products in a controlled atmosphere?
These gas-tight controlled atmosphere doors are designed to seal your storage rooms completely, preventing gas leakage or air contamination.
Whether you need to store fruits for ripening, vegetables, meat, or any other perishable goods, Ulti Controlled Atmosphere Doors are the ultimate solution for your storage needs.

- ✔ **Gas-Tight Seals**
No gas leakage or air contamination reducing the risk of product spoilage.
100% seal options available.
- ✔ **Insulated Options**
Optimal temperature and humidity control, preserving the freshness of your product
- ✔ **Window Options**
Easy monitoring without opening doors, saving energy and time.
- ✔ **Easy Operations**
Simple push-button control, making them easy to use.
- ✔ **Durable and Reliable**
High-quality materials and low maintenance

Insulated Roller Shutter Door

SECURE, SOLID AND DURABLE

This high-performance, insulated and reliable door is perfectly suited for low to medium traffic in many industrial applications.

Highly versatile with advanced safety and security features, the Insulated Roller Shutter door has thermal and acoustic insulation and is available in three colourways, with the option to add vision windows.

✓ Customisable

Available in three colourways, with optional vision windows to suit your unique application.

✓ Enhanced Safety

Whether manually operated or power-driven, high-tech safety features protect personnel, vehicles and objects from the closing zone.

✓ Versatile

Suitable for installation in warehouses, logistics facilities, manufacturing facilities, disposal sites and more.

✓ Strong and Secure

Robust design features prevent the shutter from being pushed out of the side guides by high wind loads or burglars.

Roller Shutter Door

SECURE ROLLUP DOORS

Want to increase the security of your building?

Roller shutter doors are a popular choice for providing enhanced security in industrial and commercial settings.

If you are looking for a secure and durable door for your facility, a roller shutter door is an excellent choice. It provides enhanced security and is an economical option for all types of industrial and commercial buildings.

✓ Durable Design

Made of interlocking galvanized steel slats or aluminium to withstand harsh environments.

✓ Easy Maintenance

Easy to install and maintain, making them cost-effective.

✓ Economical

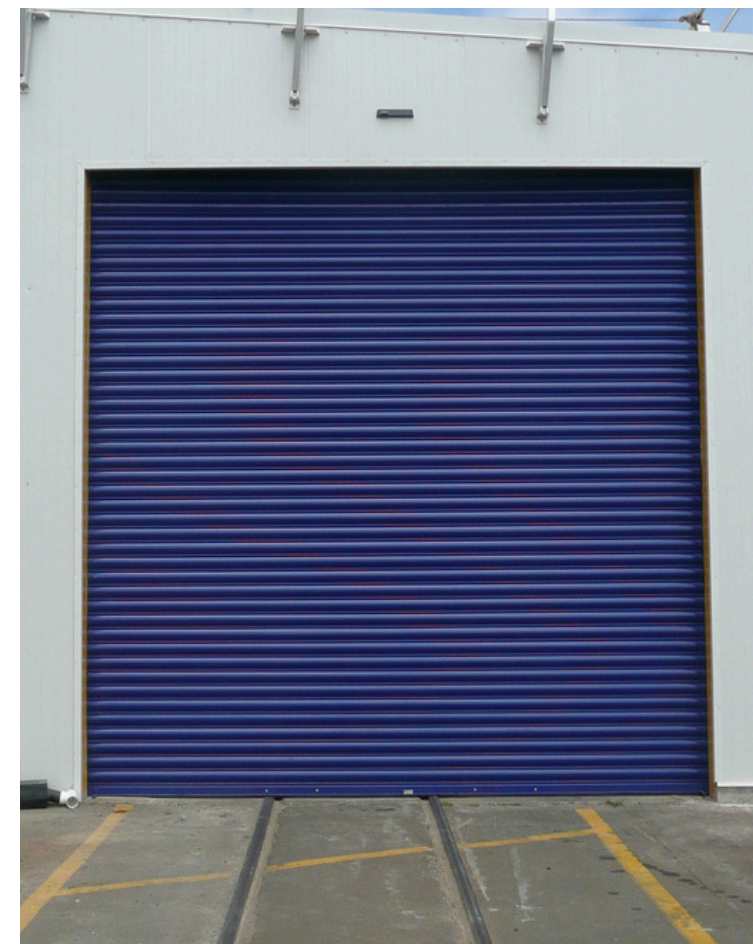

Affordable option for a durable and secure door.

✓ Secure

Provides a highly secure barrier, deterring theft and intrusion.

✓ Individual Slat Replacement

Damaged slats can be replaced individually, saving on repair costs.

WE ARE YOUR PARTNERS

Dock Loading Systems, Load Your Way To Success

Investing in top-notch dock loading systems is crucial for maximizing productivity and profitability. At Ulti Group, we specialize in providing comprehensive solutions tailored to meet the unique needs of your warehouse.

From state-of-the-art dock levellers to advanced seals and shelters, we offer a complete range of solutions designed to streamline operations, enhance safety, and save energy. Our systems are engineered to optimize efficiency, reduce downtime, and minimize risk, ensuring your operations run smoothly around the clock.

Whether you're upgrading an existing dock or embarking on a new construction project, our team of experts is here to guide you every step of the way. With our wealth of expertise and unwavering commitment to quality, you can trust us to deliver solutions that exceed your expectations. Don't let inefficiencies slow you down. Upgrade to our dock loading systems today and experience the difference in your warehouse performance!

Whether you are looking to upgrade an existing dock or build a new one from scratch, we have the expertise and experience you can trust.

Dock Levelers

Leveller solutions to create the smoothest transfer from the building to the trailer – offering full-width trailer access for increased performance and safety at your loading dock. For solutions you can trust, we've got you covered

Dock Seals & Shelters

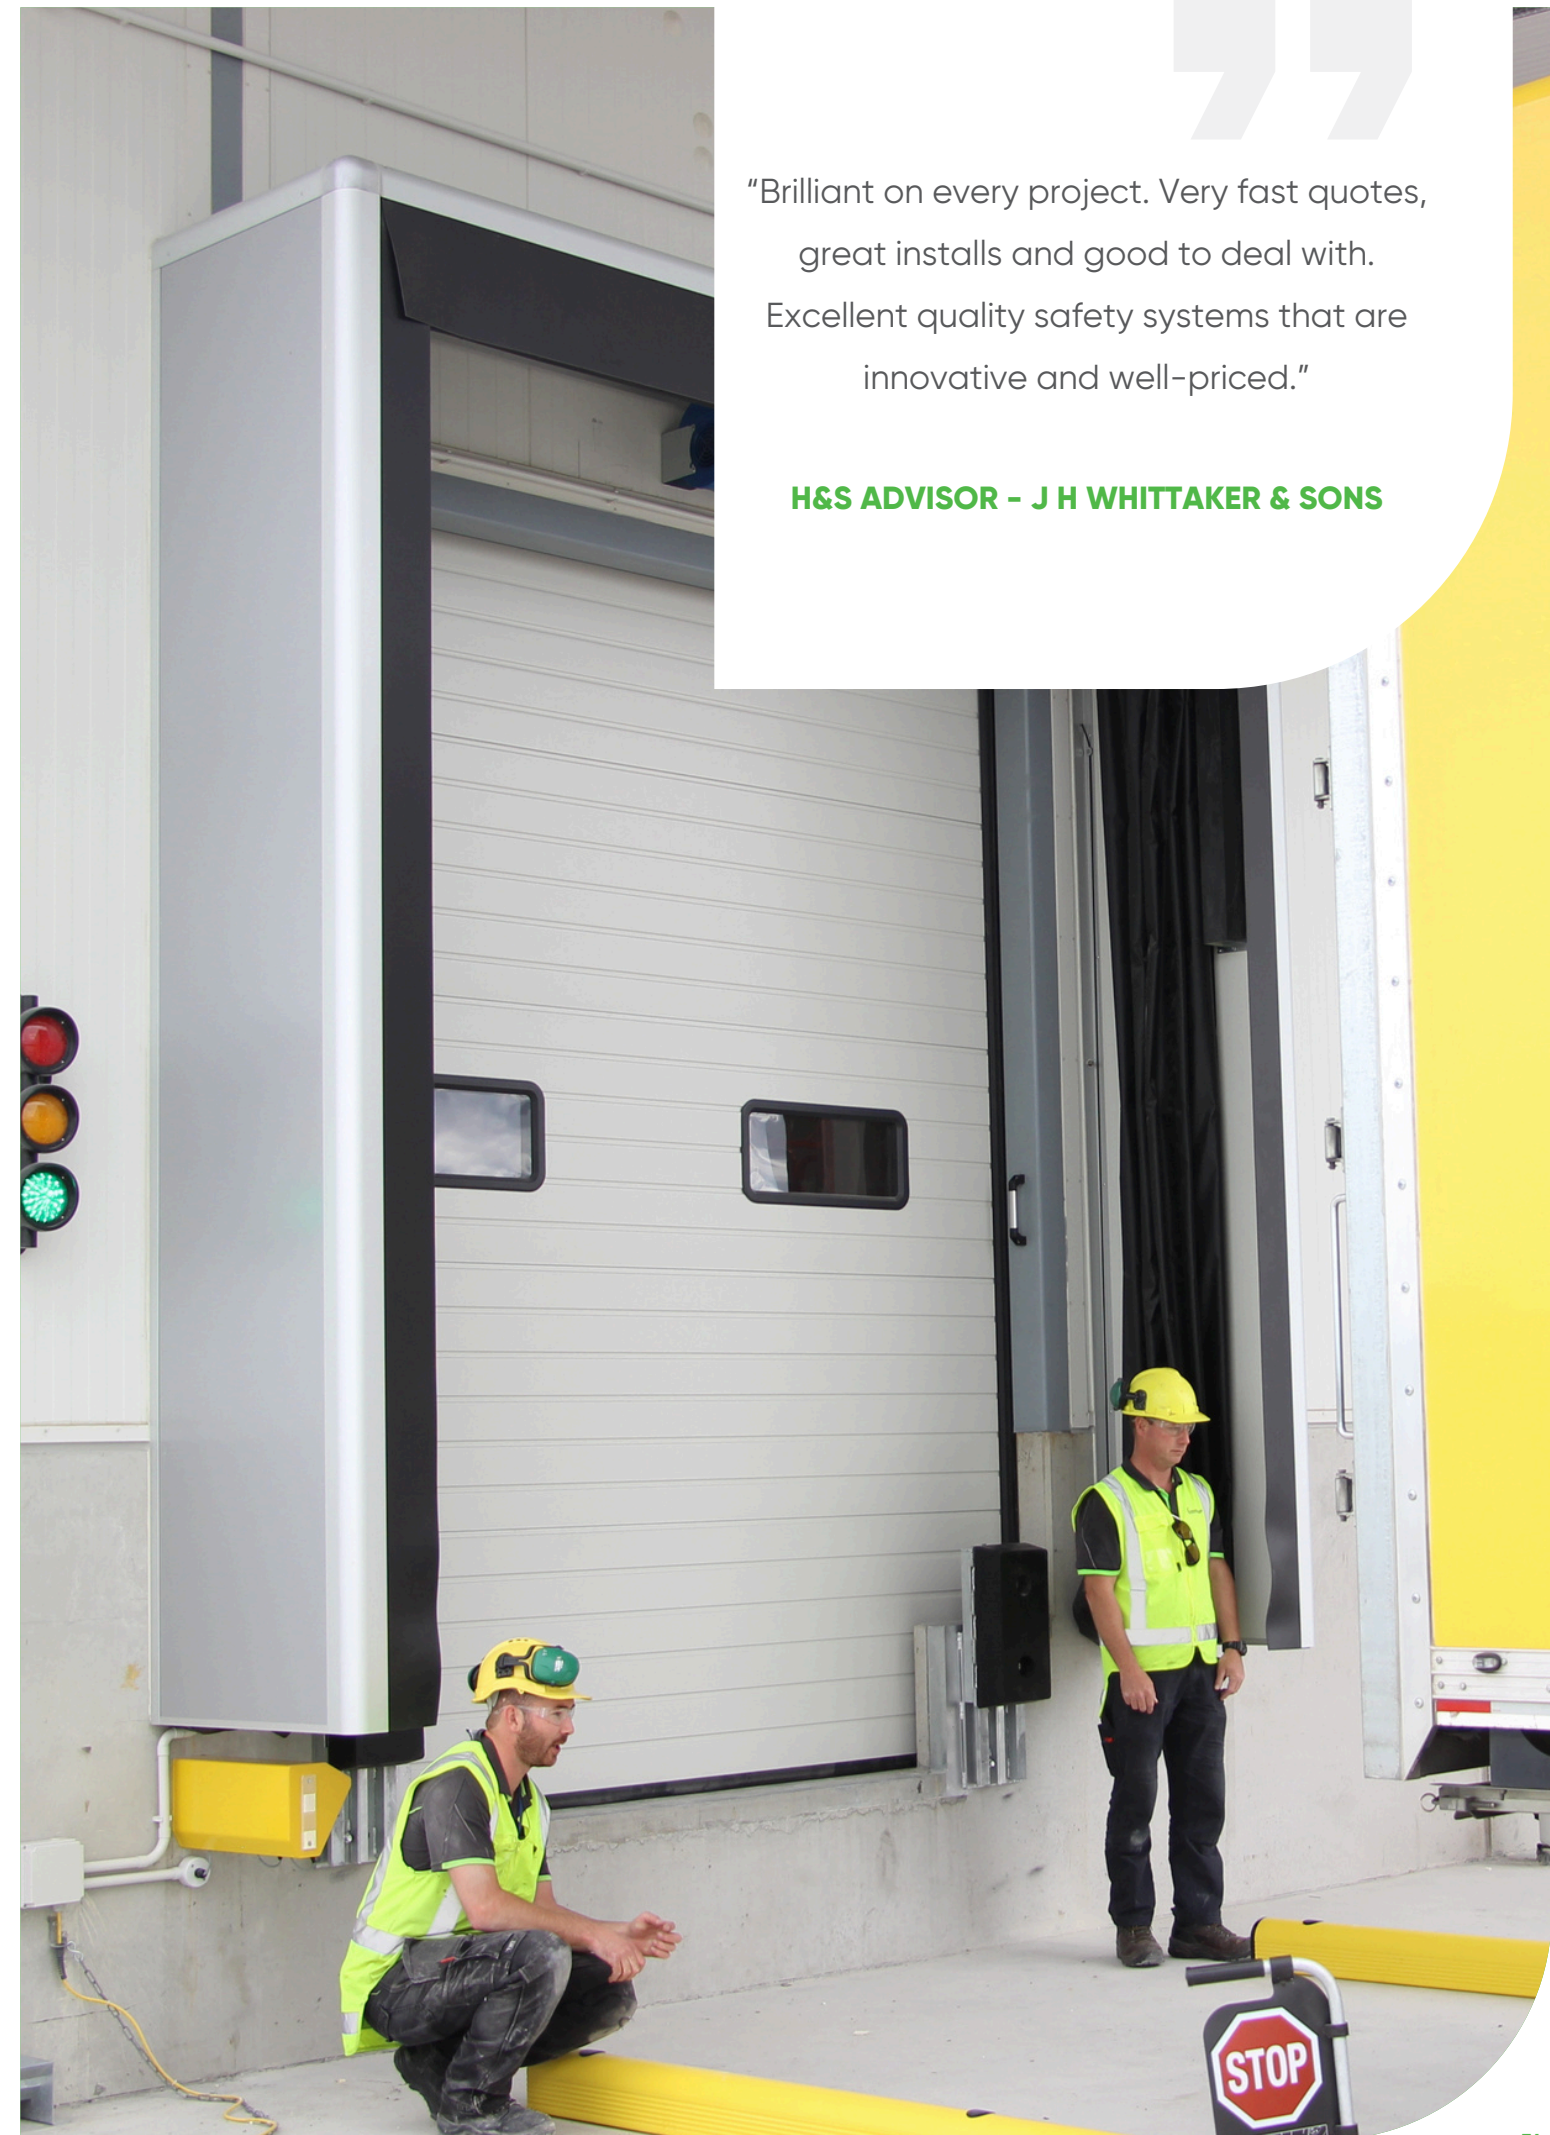

We offer a range of fixed and inflatable dock seals and shelters designed to prevent energy loss, reduce outside noise and air pollution, and protect your products during loading and unloading.

Dock Safety & Accessories

We understand that safety is of paramount importance when it comes to loading docks. That's why we offer a wide range of dock safety options designed to keep accidents at bay

“Brilliant on every project. Very fast quotes, great installs and good to deal with. Excellent quality safety systems that are innovative and well-priced.”

H&S ADVISOR - J H WHITTAKER & SONS

Horizontal Storing Dock Leveller

SMOOTH AND EASY HYDRAULIC PIT LEVELLER

This innovative product features hydraulic positioning of both the lip and platform, which ensures high reliability and low maintenance. Unlike vertical storing dock levellers, which are stored upright and require more space, this dock leveller is stored in the dock pit and can be activated with a simple push of a button. Whether you need to load or unload forklifts, containers, or trailers, this dock leveller can handle it all. Don't settle for less, get the best dock leveller in the market today.

✓ Smooth Transition

The dock leveller provides a smooth transition between the dock, leveller and trailer, which helps prevent injuries and minimize forklift and product damage.

✓ Versatile Application

The dock leveller can handle different types of loads, such as forklifts, containers, or trailers, and can fit different dimensions of dock pits.

✓ Push Button Activation

The dock leveller can be activated with a simple push of a button, which provides the dock attendant with easy and safe operation.

✓ Safety Features

The dock leveller has constant-pressure push-button controls, run-off guards, and a maintenance strut to protect the operator, the forklift driver, and the product from accidents or damage.

✓ Hydraulic Positioning

The lip and platform are positioned hydraulically, which ensures high reliability, and low maintenance of the dock leveller.

Vertical Storing Dock Levellers

HYDRAULIC DOCK LEVELLER FOR SUPERIOR SECURITY

If you are looking for a dock leveller that offers superior security, environmental control, and smooth transition loading, look no further than the Vertical Storing Dock Leveller.

Unlike horizontal levellers that store in a pit, vertical storing levellers store upright behind the overhead door, allowing you to seal the dock opening completely and prevent contamination, energy loss, and increasing security. Vertical storing levellers also provide a smooth transition between the warehouse floor and the trailer bed, reducing the risk of injuries and damage. With vertical storing dock levellers, you can optimise your loading dock safety, productivity, and efficiency.

✓ Environmental Control

4-sided seal to prevent contamination and energy loss.

✓ Industry Leading Safety

Sensors to protect from pit accidents and hydraulic failure.

✓ Smooth Transition

Self-flexing deck, constant radius hinge, and extended lip chamfer to reduce Dock Shock.

✓ Drive-Thru Approach

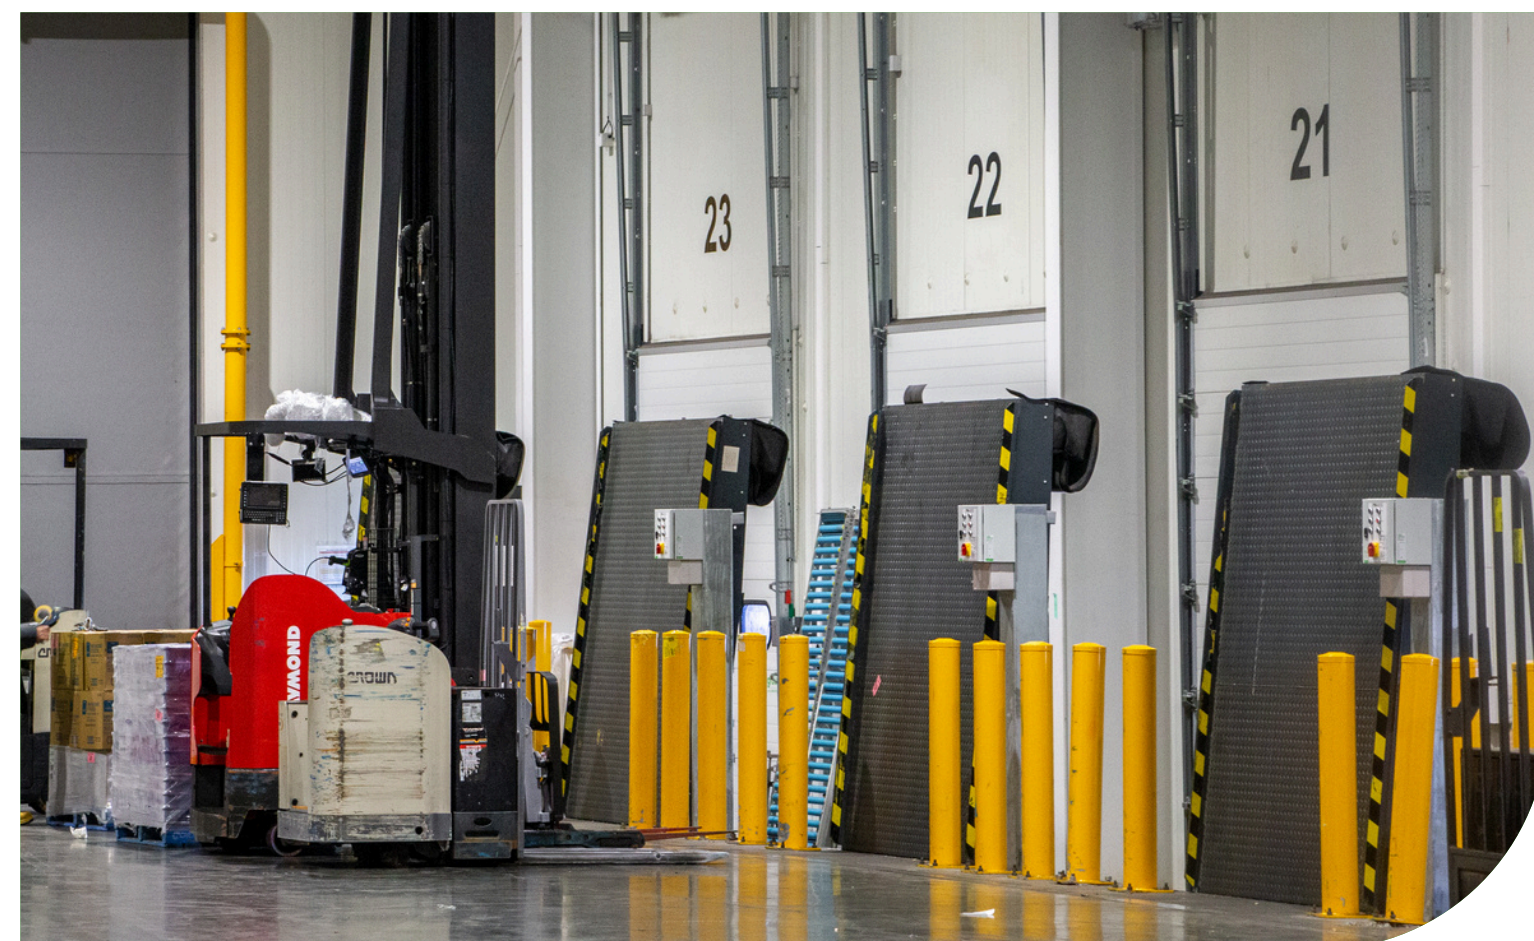

Trailer doors open inside for safety, security and superior temperature control in chilled environments.

✓ Productivity

Constant-contact controls and biodegradable fluid for efficiency and sustainability.

✓ Wide range of truck Servicing

Optional hinged and telescopic dock lips mean a wide range of truck configurations can be serviced.

Container Leveller

DOCK LEVELLER FOR LOADING CONTAINERS ON TRAILERS

Ulti Group's Container Dock Loading System offers a comprehensive solution for safe, efficient and time-saving container loading.

Ulti Group's Container Dock Loading System is a game-changer for businesses looking to improve productivity and safety by reducing manual handling of products, enhancing communication between truck and loading personnel, and ensuring product integrity.

Partnering with Ulti Group means working with an experienced provider with a proven track record in delivering quality equipment that protects what matters to you.

✓ Increased efficiency

The design of the leveller allows for easy access to containers positioned in the middle of trailers, reducing unloading/loading time and improving productivity.

✓ Integrated Control Box

The Dock Commander control box allows for the leveller, lights, and dock door to be fully integrated and work together in the safest and most efficient way possible.

✓ Mounting Options

The leveller can be mounted inside the building with a dock pit or in front of the loading docks, making it adaptable to different building designs.

✓ Versatility

The leveller can be used with both normal backloading trucks and those with containers, providing a flexible solution for various truck types.

✓ Improved safety

The integration of the control box ensures that safety is prioritized during the loading/unloading process.

✓ Durable and Reliable

The high-quality materials used to construct the leveller ensure its durability and reliability in even the most demanding environments, providing customers with a long-lasting and efficient solution.

Edge of Dock Leveller

SIMPLE DOCK TO TRUCK LEVELLER FOR AN OPEN DOCK

Looking for a low-cost solution for bridging the gap between the dock and a truck? The Edge of Dock Leveller is a low cost solution if you need a simple dock leveller to bridge the gap between the dock and a truck.

Unlike a hydraulic leveller, the Edge of Dock Leveller is manually operated and positioned on the edge of the dock and does not require any pit installation or storage space. It is ideal for trucks with minimal height difference and docks with limited space. It can also be upgraded to a hydraulic system if needed in the future.

✓ Simple and Effective

The Edge of Dock Leveller is a low-cost solution that bridges the gap between the dock and a truck with minimal effort and maximum efficiency.

✓ Easy to Operate

The Edge of Dock Leveller is ready to use with no power source or hand pump needed. Just flip the lever to activate the lip and place it on the truck bed. Hydraulic options available.

✓ Durable and Safe

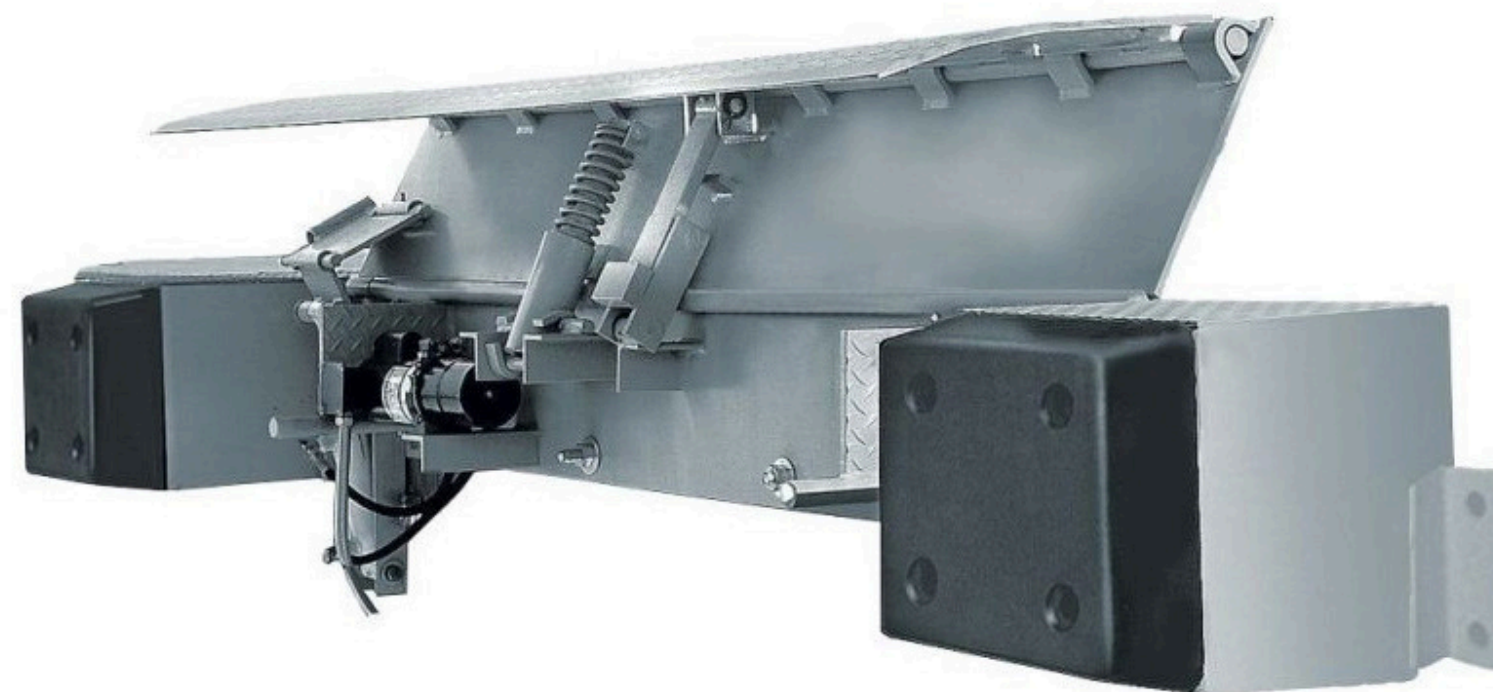

The Edge of Dock Leveller is made of high-quality steel and has a large support plate to prevent sinking into the ground. It also comes with optional dock bumpers to protect it from truck damage.

✓ Space-Saving Design

Unlike a hydraulic leveller, which requires a pit installation and storage space, the Edge of Dock Leveller is positioned on the edge of the dock and does not take up any extra room.

✓ Versatile and Adaptable

The Edge of Dock Leveller can handle trucks with a limited range of bed heights and widths. It can also be upgraded to a hydraulic system if needed in the future.

Endura Inflatable Dock Seal

DOCK SEAL FOR ULTIMATE FLEXIBILITY

Do you want to save money on heating and cooling costs while keeping your facility free from pests and vermin? Then you need the Endura Inflatable Dock Seal. Blows up and seals around the truck when docked, reducing energy loss and creating a barrier for pests. Offers the greatest amount of flexibility by accommodating the largest variety of truck heights. Ideal for temperature-sensitive or hygiene-critical applications. Use an Inflatable Dock Seal for a safer, cleaner, and more productive dock system.

✓ Energy Efficiency

Save money on heating and cooling costs by preventing air leakage

✓ Speed

Inflate and deflate the seal faster with its unique airbag and connector design that reduces drag and increases airflow.

✓ Durability

Extend the life and performance of your seal with the Inflatable Dock Seal's robust frame, smooth and easy side bag retraction, and resilient stitching and material that resists damage and leaks.

✓ Pest Control

Keep your facility free from pests and vermin by creating a tight barrier around the truck

✓ Versatility

Accommodate the largest variety of truck heights with the Inflatable Dock Seal's unique top curtain that inflates until it seals against the top of the truck.

Endura Flexible Dock Shelter

AN IMPACTABLE AND DURABLE DOCK SHELTER

Looking for a flexible dock shelter that can withstand repeated hits from off-centre trailers? With a durable foam frame, a pivoting canopy header, and friction-resistant fabric that makes it long-lasting and robust, the Endura Flexible Dock Shelter creates a tight seal around the truck that reduces energy costs and prevents outside elements from entering the dock area.

- Flexible Frame**
Absorbs impact from off-centre trucks and reduces maintenance costs.
- Friction-Resistant Fabric**
Protects against wear and tear and extends the shelter's life span
- Versatile Design**
Fits a range of truck sizes and dock door openings
- Pivoting Header**
Adjusts to different trailer heights and provides full access to the trailer entry.
- Tight Seal**
Reduces energy loss and helps keep out dust, pests, and the elements

Extendable Dock Shelters

EXPANDABLE CONTAINER DOCK SHELTER

Need a weather-protected environment for safe and efficient loading?

This container dock shelter protects products from rain, dust, birds and more during on-grade loading, and reduces energy loss in chilled loading environments to save you money.

As a dependable and reliable solution to protecting your products during loading, the Rollout Container Shelter helps prevent costly losses and damage to your container contents.

✓ Easy to Use

With a choice of manual or automated operation.

✓ Relocatable

Easy relocation or alteration should your loading requirements change over time.

✓ Energy Savings

Protects chilled or frozen goods from moist air and the sun, providing energy savings over time that more than cover the cost of the shelter.

✓ Locally produced in New Zealand

✓ High Value

Innovative design enables loading to be completed at ground level, which has considerable cost benefits.

✓ Versatile

Able to replace more expensive options such as large loading canopies or recessed dock pits.

✓ Diverse Application

Ideal for chilled and frozen logistics, food manufacturers, distribution centres and more.

Smart Global Wheel Chock

ELECTRONIC WHEEL CHOCK VEHICLE RESTRAINTS

Do you want to ensure the safety and efficiency of your loading and unloading operations? If so, you need smart global wheel chock, the ultimate device that stops trailers from moving and communicates with drivers and dock workers.

Smart global wheel chocks are made of strong aluminium and have a sensor that activates a light and sound system to indicate when the chock is engaged. It is simple to use, requires minimal maintenance and is a great first defence against loading accidents, giving you the peace of mind that comes with a safe and smooth docking process.

✓ Stop trailers in their track

The product has a sturdy aluminium wedge that blocks trailer tyres and prevents movement.

✓ Enhance your docking safety

The product can be integrated with other loading components to improve the visibility and safety

✓ High Value

The product has a sensor that triggers a light and sound system that signals when the chock is on and when it is safe to load or unload.

✓ Cost Effective

The product is low maintenance and a cost-effective first defence against loading accidents

✓ No hassle, no fuss

The product is simple to use, without complex mechanical or electrical parts, needing only manual placement and removal.

Manual Global Wheel Lock Truck Restraint

MANUAL SURFACE MOUNTED VEHICLE RESTRAINT

Want to protect your loading operation from trailer creep?

The manual truck restraint is designed to secure a wide range of trailers, including those with or without a rear impact guard, to the loading dock, and is an essential tool to ensure safe and efficient loading and unloading operations.

This reliable and flexible solution provides maximum safety for loading and unloading operations, preventing accidents caused by unexpected trailer movement or separation from the dock, which can result in costly property damage, personal injury, and even death.

✓ Versatile Trailer Compatibility

The Manual Wheel Lock can restrain a wide variety of trailers making it a versatile solution for all kinds of loading docks.

✓ Low Maintenance

The Manual Wheel Lock features a simple, reliable mechanical design that allows for minimal maintenance with self-lubricated rollers, bushings, and few moving parts. It is easy to install and optimally performs in all-weather conditions, making it a cost-effective solution for any loading dock.

✓ Flexible Positioning

The high-strength steel locking arm adjusts to the widest variety of trailers, and the ergonomic design can be conveniently positioned with minimal force in front of the rearmost or front-rear tire for tight reliable engagement. This ensures consistent on-centre trailer positioning for optimal safety.

✓ Durable Construction

The Manual Wheel Lock vehicle restraint is constructed of structural and formed steel and is surface mounted to the concrete. All structural components are electroplated or painted for all-weather corrosion resistance, ensuring long-lasting durability and reliability.

Automatic Global Wheel Lock Truck Restraint

THE ULTIMATE IN DOCK SAFETY

Want to protect your people at the loading dock?

The Global Wheel-Lock is the ultimate vehicle restraint system designed to enhance loading dock safety and protect against surprise vehicle movement, making it a must-have solution for any business looking to ensure the safety of their employees and cargo.

The original and most trusted trailer restraint system on the market, featuring flexible automatic positioning, consistent on-centre trailer positioning, and a low maintenance design that performs optimally in all weather conditions, making it a must-have for any loading dock.

✓ Flexible Automatic Positioning

The Global Wheel Lock features a high-strength steel locking arm that adjusts to the widest variety of trailers for tight engagement, making it a versatile and reliable solution that can accommodate different types of vehicles.

✓ Friction-Resistant Fabric

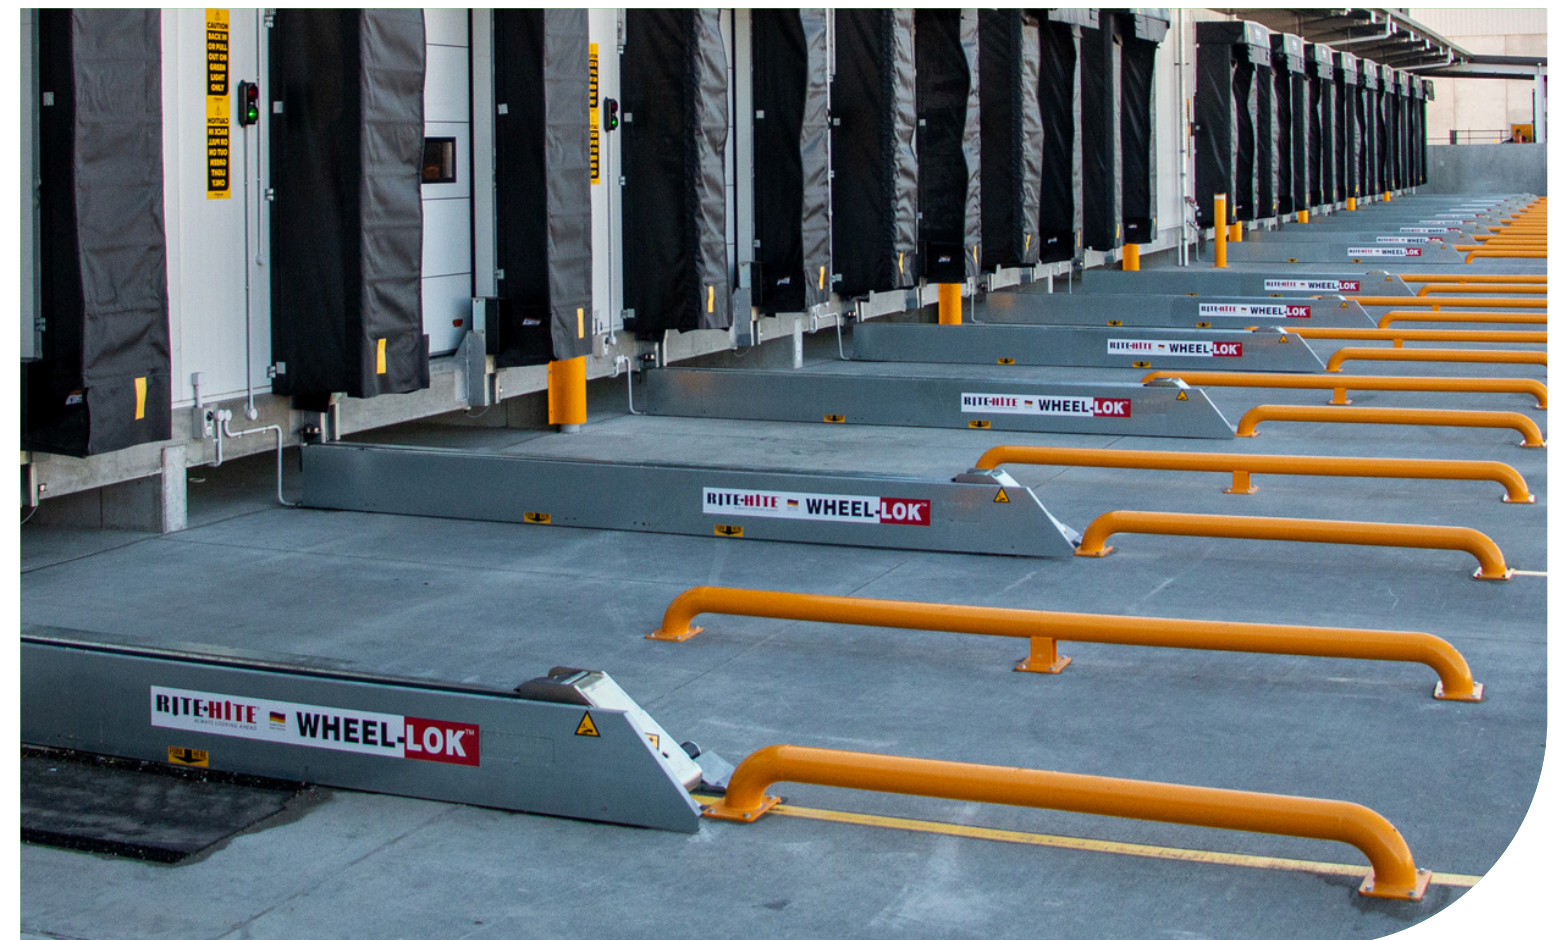

The simple, reliable electro-mechanical design allows for minimal maintenance with self-lubricated rollers, bushings, and few moving parts, making it an easy-to-use and cost-effective solution that requires minimal maintenance.

✓ Consistent Positioning

The two wheel guides ensure on-centre trailer positioning, protecting the building wall and enhancing dock seal or shelter effectiveness, which can reduce the risk of property damage and enhance overall safety.

✓ Interlocked

It can be interlocked into dock light communication systems, including Approach-Vu™, Pedestrian-Vu™, Corner-Vu™, and Leveler-Vu™, providing a comprehensive solution for improving communication and reducing the risk of accidents at the loading dock.

Truck Wheel Guides

HEAVY DUTY RAILS TO ENSURE LOADING ALIGNMENT

Don't let your dock loading area become a disaster zone.

Wheel guides are the smart way to keep your trucks aligned and your dock damage free.

Ulti Wheel Guides prevent costly damage to your building, improve loading safety and efficiency, and save energy by ensuring a good seal at the dock. Wheel guides are easy to install and gentle on your truck tyres. They make truck docking a breeze.

✓ Easy Alignment

Wheel guides help you align your truck or trailer with the dock, making docking faster and easier.

✓ Safe Loading

Wheel guides reduce the risk of off-centre trucks or trailers that can cause unsafe loading conditions or damage to the dock leveller.

✓ Tyre Protection

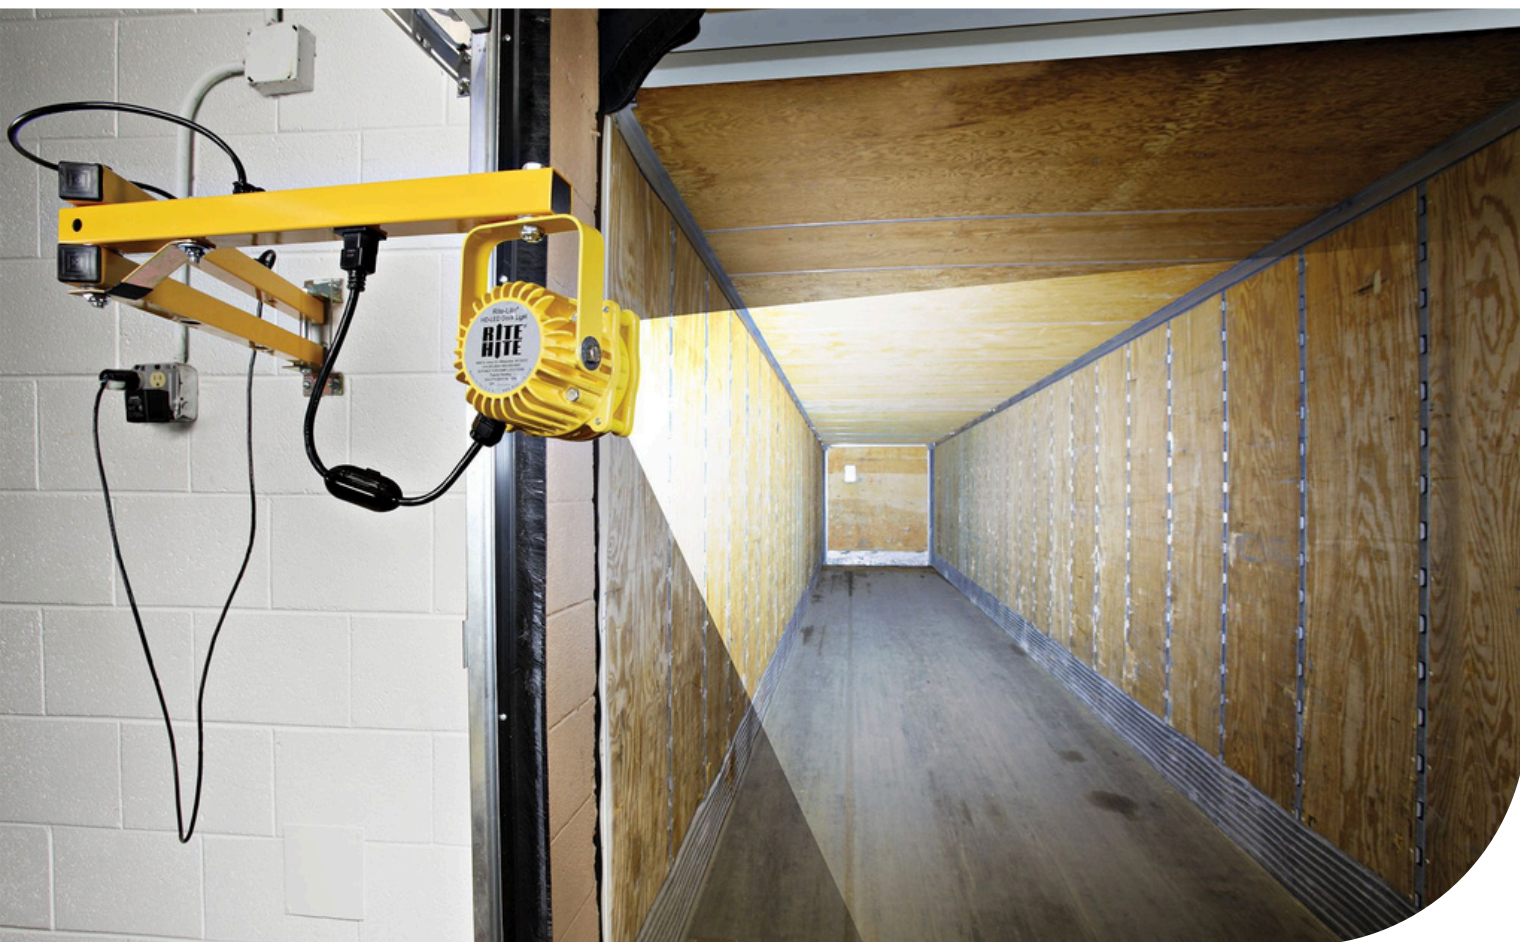

Ulti Wheel guides have smooth, rounded corners that won't harm your truck tyres, unlike concrete guides that can have sharp edges and cause wear and tear.

✓ Better Sealing

Wheel guides ensure trucks are central and straight on the dock, allowing the dock seals to seal properly and prevent cold air loss.

✓ Damage Prevention

Wheel guides protect your building walls and dock shelters from impact damage caused by misaligned trucks or trailers.

Loading Dock Lights

SAFETY LIGHTING FOR THE LOADING DOCK

✓ Clear Lighting Signals

Red and green traffic lights signal when it's safe to enter or exit the dock, minimizing the risk of accidents and injuries.

✓ Live Status Communication

Light signals provide immediate communication to forklift operators, helping to prevent accidents and equipment damage if loading conditions change.

✓ Integration with Control Systems:

Integration with building control systems streamlines the docking process, saving time and reducing the potential for errors.

✓ Expandable

Rite-Vu™ system including Pedestrian-Vu, Approach-Vu, Leveler-Vu and Corner-Vu uses motion detection, line-of-sight notification, and alarms to prevent accidents and injuries, and can be expanded to provide full 360 safety

Loading Dock Lights

SAFETY LIGHTING FOR THE LOADING DOCK

✓ Brighten Up Your Dock

Don't let dim trailers slow you down. With loading dock lights, you can see clearly and work efficiently in any lighting condition.

✓ Flexible and Strong

Adjust the light to any angle with a robust adjustable arm.

✓ LED or Incandescent

Pick the light that fits your needs and budget. LED lights are more eco-friendly and long-lasting, while Incandescent lights are cheaper and simpler to replace.

✓ Motion Sensing Technology

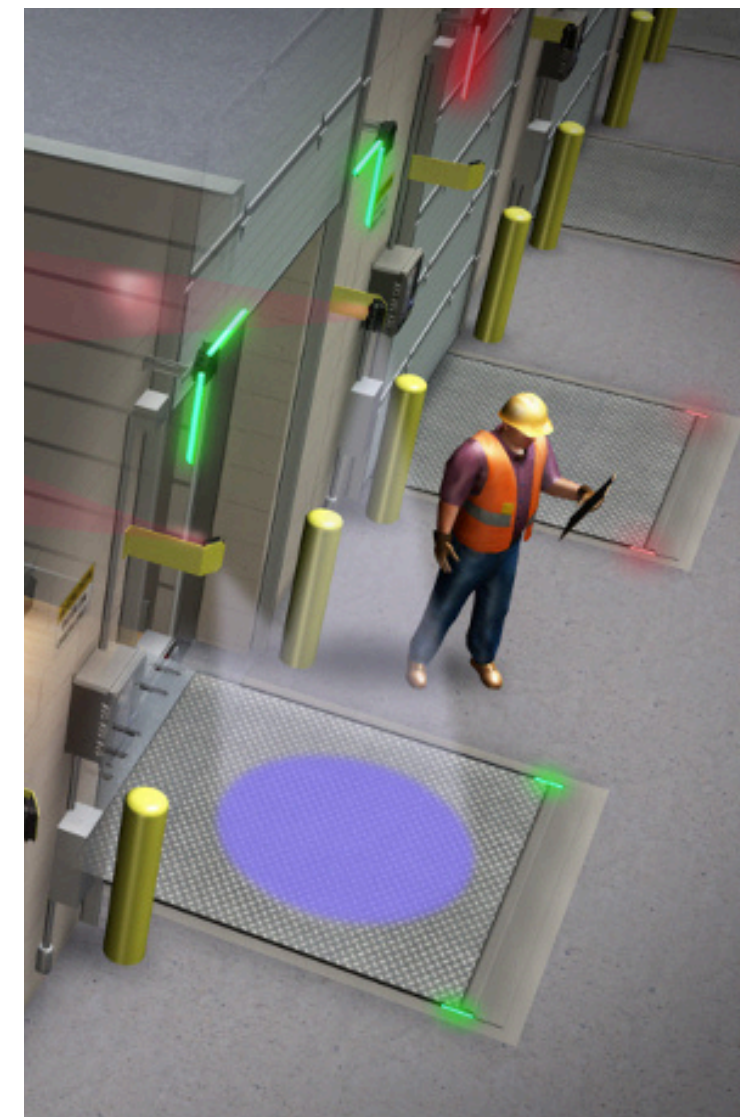

Automatically adjusts the light output based on loading activity and saves energy.

✓ Built to Last

Loading dock lights are made of durable material that can handle heat and shock.

✓ Safe and Compliant

Ulti loading dock lights are compliant to NZ standards and help prevent accidents and injuries by improving visibility and awareness.

Loading System Integrated Controls

CENTRALISED CONTROLS FOR ALL DOCK EQUIPMENT

Want to improve their dock loading performance and reduce the risk of accidents? Loading System Integrated Controls is a smart and easy solution to improve your loading performance.

It combines the controls of multiple devices into one centralised panel, ensuring safety and efficiency at every step. Whether you need to operate a vehicle restraint, a truck leveller, a dock leveller, a dock door, or a dock shelter, you can do it all with one control box.

- One Box, Many Devices**
 Control multiple dock loading devices with one box, managing all your controls from one centralised panel.
- More Efficiency, Less Hassle**
 Save time and money by making it easy for your staff to optimise the loading sequence

- Safety First**
 Avoid accidents with an interlocking system that guides you through the right sequence.
- Your Choice, Your Way**
 Customize your options and configurations to fit your needs.

Impactable Bollard & Barrier Range

THE ULTIMATE IMPACT PROTECTION

Want ultimate protection for your assets?
Protect your people and equipment with PVC Impactable barrier that is shock-absorbent, modular and eco-friendly. Modular components.
You can easily assemble them to create any access way you need. They come in standard or custom sizes to suit your space.

✓ PVC Impactable barriers

The flexible, hygienic and eco-friendly barriers that outperform steel in the food industry

✓ Modular and Versatile

Adjust the length and shape to fit any area

✓ Eco-friendly and reusable

Reduce waste and save money

✓ Shock-absorbent and scratch-resistant

No dents, no rust, no maintenance

✓ Highly visible and easy to clean

Enhance safety and hygiene in your workplace

Door Impact Protection

DOOR PROTECTION BOLLARDS AND GUARDS

It's always better to protect your door before an expensive accident occurs.

Installing Door Impact Protection is a smart investment for any business that wants to protect its doors and keep its personnel safe.

Installing Door Impact Protection such as door bollards, full frame bollards and track guards is a smart investment that can help prevent costly downtime and repairs caused by accidental impacts, ensuring your door remains in good condition and your facility remains safe for your personnel. With their low maintenance and easy replacement options, as well as their versatile protection options, they are a cost-effective way to prevent expensive downtime and repairs caused by accidental impacts.

✓ Safety

Accidental impacts to your doorways can cause hazards for your personnel, including falling objects. Door bollards and barriers can help eliminate these dangers, creating a safer work environment in your facility.

✓ Options

You can choose from different types of door protection options, such as door bollards, full frame bollards, and track guards. This allows you to choose the best option for your specific needs.

✓ Low Maintenance

By protecting your door and doorway from accidental impact, damage and maintenance costs are reduced greatly. Instead of having to repair parts of or replace your whole door or doorway, you only need to replace the barrier or guard, which is of much lower value.

Ulti Industrial Curtain Wall

PARTITIONING PVC FABRIC CURTAIN WALLS

Need a wall, but don't want the hassle of traditional construction?

Separate and partition off specific areas of your facility with a durable, flexible curtain wall system to control temperature, noise levels, privacy, hygiene and more.

With low construction costs and no requirement to get a building permit, Ulti's Industrial Curtain Walls are fast to install and can be reconfigured to suit your facility's changing needs giving you the adaptability you need to keep your business running smoothly.

✓ Flexible and Adaptable

Easy reconfiguration, relocation, or removal of the curtains as your facility needs change, providing you with the adaptability you need to keep your business running smoothly.

✓ Acoustics Curtains

Protect employees' hearing by partitioning off separate sound zones anywhere, reducing noise levels by up to 25dB.

✓ Vision Option

Clear vision panels and be integrated into our curtains to provide natural light and attractive, safe work conditions

✓ Insulated Curtains

Insulated curtains keep areas cool or warm, protecting temperature-sensitive items, increasing employee comfort, and reducing energy costs

✓ Fast Installation

Our curtains are easy to install, fast, clean, and create minimal disruption and contamination.

✓ Intergrated Doorways

Door options range from PVC strip curtains through to high speed doors to give you the perfect balance of acces and environment protection.
