

Heavy Duty Roller Shutter Door

HOW MANY INDUSTRIAL
PRODUCTS LOOK THIS GOOD?

Ulti Heavy Duty Roller Shutter Doors are available in either a galvanised steel finish or can be powder-coated to the colour or colours of your choice. The steel slat profile is a sleek contemporary design that will enhance the appearance of your building, adding value to your brand and creating a favourable first impression with visitors.

Benefits

- Eliminates the need for grease, providing a cleaner, quieter door
- Spring-assisted opening ensures motor can't be overworked
- Springs allow controlled descent in the unlikely event of chain breakage
- Heavy-duty weatherseal contacts to ground at 3 points, providing a superior seal
- Powered by Grifco®

Control and manage your doors from anywhere with your smartphone. E-Drive with myQ connectivity utilises the latest logic and smart technology and builds upon Grifco's trusted legacy for traditional spring-balanced roller shutters, doors and grilles.

Regarded as the industry benchmark, E-Drive with myQ offers powerful unbeatable performance for commercial doors. The proprietary expandable logic enables exceptional versatility and adaptability on location.
